The application is written around the applications in the Windows version of the Data Miner, and all calculations are carried out in 32 bits. The application, however, continuously provides the outcome in both 32 and 64 bits (only on the two workstations).

The controls in the 64 bits-worksheet allow the operator to select which units they want to use to output the data for the calculations. The controls are available for the calculations for the calculations for either MPC (0.4999) and 2.5×10^{-5} (0.000025) and MPC to suit. If MPC is required as the basis the user can manually change the settings.
