Resources in Education ,2001-10 The Excluded Past Robert MacKenzie,Peter Stone,2013-10-23 A ground breaking book that examines the uneasy relationship between archaeology and education Argues that archaeologists have a vital role to play in education alongside other interpreters of the past Contributors from different countries and disciplines show how the exclusion of aspects of the past tends to impoverish and distort social and educational experience *Tusaayaksat - 2022-1* Tusaayaksat Magazine,2022-12-01 A collection of stories from Inuvialuit that represent the broad theme of Education Holistic Learning and Knowledge Transfer In the pages of this issue you will find stories by Inuvialuit who are learning formally traditionally physically mentally emotionally and spiritually Contemporary Studies in Environmental and Indigenous Pedagogies Andrejs Kulnieks,Dan Roronhiakewen Longboat,Young Young,2013-06-13 Contemporary Studies in Environmental and Indigenous Pedagogies A Curricula of Stories and Place Our book is a compilation of the work of experienced educational researchers and practitioners all of whom currently work in educational settings across North America Contributors bring to this discussion an enriched view of diverse ecological perspectives regarding when and how contemporary environmental and Indigenous curriculum figures into the experiences of curricular theories and practices This work brings together theorists that inform a cultural ecological analysis of the environmental crisis by exploring the ways in which language informs ways of knowing and being as they outline how metaphor plays a major role in human relationships with natural and reconstructed environments This book will be of interest to educational researchers and practitioners who will find the text important for envisioning education as an endeavour that situates learning in relation to and informed by an Indigenous Environmental Studies and Eco justice Education frameworks This integrated collection of theory and practice of environmental and Indigenous education is an essential tool for researchers graduate and undergraduate students in faculties of education environmental studies social studies multicultural education curriculum theory and methods global and comparative education and women s studies Moreover this work documents methods of developing ways of implementing Indigenous and Environmental Studies in classrooms and local communities through a framework that espouses an eco ethical consciousness The proposed book is unique in that it offers a wide variety of perspectives inviting the reader to engage in a broader conversation about the multiple dimensions of the relationship between ecology language culture and education in relation to the cultural roots of the environmental crisis that brings into focus the local and global commons language and identity and environmental justice through pedagogical approaches by faculty across North America who are actively teaching and researching in this burgeoning field *The ETS Test Collection Catalog* Educational Testing Service. Test Collection,1993 The major source of information on the availability of standardized tests Wilson Library BulletinCovers commercially available standardized tests and hard to locate research instruments *School Leadership in the Context of Standards-Based Reform* Louis Volante,2012-05-16 Although standards based reform emerged in the United States and the

United Kingdom the idea has spread across the world as an approach to systemic reform It might appear that there is a world wide tsunami of standards based reform that will standardize and homogenize the educational system across the globe This volume makes it very clear however that there is no one approach to standards based reform and countries change there is a danger in paying attention to its evolution and impact in only one context That s what makes this volume so valuable Louis Volante has drawn together descriptions from a wide range of countries all involved in large scale reform and using standards and assessments as part of their process What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals values and processes I m sure you will find this book as interesting and challenging as I have a gem that pushes your thinking and does not allow readers to remain neutral Lorna Earl

Becoming a History Teacher Ruth Sandwell,Amy von Heyking,2014-01-01 Becoming a History Teacher is a collection of thoughtful essays by history teachers historians and teacher educators on how to prepare student teachers to think historically and to teach historical thinking

Youth in Canadian Politics Kathy Megyery,1991-01-01 When is a person mature enough to vote Would lowering the voting age compromise political processes Would giving people the vote stir them to greater involvement What would be the effect on other laws affecting youth What are the Charter implications The studies in this volume uncover a wide range of opinion about young people and their involvement in politics The author point to the diversity of perceptions about the attitudes and attributes of youth even among young people themselves In considering the appropriate age for the vote they cast light on the overall status of young Canadians in terms of rights laws institutions and public opinion Raymond Hudon and colleagues study political involvement by Quebecois youth Patrice Garant investigates legal and Charter implications of lowering the voting age Jon Pammett and John Myles argue that lowering the voting ages to 16 would be a low risk initiative All concur that generalizing about 16 to 18 year olds is as difficult and questionable as making sweeping statements about any othe rage defined sociological group

Secondary School External Examination Systems Barend Vlaardingerbroek, Neil Taylor,2009 Summative assessment has been a contentious issue in educational circles for several decades particularly high stakes assessment events which arise at various junctures of the school cycle especially those at the end of it The French Baccalaureat and English A Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people s lives as their outcomes are principal determinants of young people s future prospects These examinations are external they are devised conducted and processed by agencies outside the schools usually ministerial examination units As such they act as blind arbiters of student achievement providing the proverbial level playing field which ensures the comparability of outcomes In the pyramidal school structures of yesteryear examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education Exit points occurred from primary school level up from where

unsuccessful candidates could enter the labour force and or embark on occupationally specific further education and training With the modernisation of the labour market and an ever higher social demand for access to higher levels of formal education the filtering function of examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems including the modification and in some instances abandonment of external examinations This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P Heyneman of World Bank repute there are sixteen chapters presenting Country Case Studies which have been written up under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics
