Knowledge Creation In Education Education Innovation Series:

Knowledge Creation in Education Seng Chee Tan, Hyo Jeong So, Jennifer Yeo, 2014-06-12 This book arises from research conducted through Singapore's National Institute of Education on such topics as integrating knowledge building pedagogies into Singaporean classrooms with both students and teachers across school levels from primary schools to high schools. Additionally, international scholars contribute research on theories of knowledge creation, methodological foundations of research on knowledge creation, knowledge creation pedagogies in classrooms, and knowledge creation work involving educators. The book is organized in two sections. Section A focuses on theoretical, technological, and methodological issues where sources of justification for claims are predominantly theories and extant literature, although empirical evidence is used extensively in one chapter. Section B reports knowledge creation practices in schools with teachers, students, or both; the key sources of justification for claims are predominantly empirical evidence and narratives of experience. The editor asserts that schools should focus on developing students' capacity and disposition in knowledge creation work at the same time; leaders and teachers alike should continue to develop their professional knowledge as a community. In the knowledge building vernacular, the chapters are knowledge artifacts—artifacts that not only document the findings of the editors and authors but that also mediate future advancement in this area of research work. The ultimate aim of the book is to inspire new ideas and to illuminate the path for researchers of similar interest in knowledge creation in education. Technological Innovations in Education

Susanne Garvis, Therese Keane, 2023-06-21 This book provides a snapshot of technology and innovation in teacher education and teaching, highlighting innovations from the field as well as gaps in student learning. Case studies showcase the importance of social media and virtual reality to support teacher education students during their learning that allows continued opportunities for scaffolding and building a strong foundation of teacher pedagogy. This book also explores topics for future research and the theoretical and practical development for future technological advances to support all students in educational settings. It discusses practical advice for teachers and teacher educators to implement technology and innovative practices into their classrooms to support and expand learning. **Working Relationally in and across Practices** Anne Edwards, 2017-01-26 This book shows ideas from cross-professional collaborators that offer resources for professional and research practices.

Empowering At-Risk Youth in and Through Vocational Education Vidmantas Tūtlys, Tarja Irene Tikkanen, Meril Ümarik, Biruta Sloka, 2024-12-30 This open access book presents insights on the resiliency strategies of at-risk vocational education and training (VET) students in the field of learning, employment, and social integration in the Baltic countries and Norway. It investigates the ways in which vocational education and training (VET) can enhance the social inclusion of young people at risk, both in terms of combating school dropout rates and promoting transitions between various social learning contexts such as school-to-work transition. The book presents the findings of the analysis of available statistical data, disclosing the capacities and potential of the VET systems and providers to empower vulnerable learners in the project.

partner countries In the context of VET this book examines the situations of at risk young people as they experience and understand themselves in it and explores innovative solutions to address their challenges in collaboration between themselves their teachers and other community actors and stakeholders Finally it analyses and discusses the innovative pedagogical interventions used in empowering at risk VET students as implemented in the research project EmpowerVET on the basis of the Educational Learning Lab model developed by researchers from the University of Tallinn School of Educational Sciences

Making a Difference: Volume I and II Sasha A. Barab,Kenneth E. Hay,Nancy Butler Songer,Daniel T. Hickey,2017-09-05 William Wordsworth 1770 1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth s later poems comparing his

work with that of his regional contemporaries as well as major writers such as Scott. The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships. A serious discussion of the place of sexual feeling in his writing is also included.

Inquiry into the Singapore Science Classroom Aik-Ling Tan, Chew-Leng Poon, Shirley S.L. Lim, 2014-05-19 This book offers an insight into the research and practices of science teaching and learning in the Singapore classroom with particular attention paid to how they map on to science as inquiry. It provides a spectrum of Singapore's science educational practices through all levels of its education system detailing both successes and shortcomings. The book features a collection of research and discourse by science educators in Singapore organized around four themes that are essential components of approaching science as inquiry: teachers' ideas and their practices; opportunities and constraints from a systemic level; students' competencies and readiness to learn through inquiry; and the need for greater awareness of the role of informal learning avenues in science education. In addition, the discourse within each theme is enriched by commentary from a leading international academic which helps to consolidate ideas as well as position the issues within a wider theoretical and international context. Overall, the papers set out important contexts for readers to understand the current state of science education in Singapore. They also highlight strengths and gaps in practices of science as inquiry as well as provide suggestions about how the system can be improved. These research findings are therefore helpful as they provide honest and evidence-based feedback as well as tangible and doable ideas that policy makers, teachers, students, and school administrators can adopt, adapt, and enhance.

Achieving Evidence-Informed Policy and Practice in Education Chris Brown, 2017-11-27 This book provides an overview of research and ideas in relation to evidence-informed policy and practice (EIPP) in education. The chapters all share a single overarching purpose: providing insight into how EIPP in education can be achieved. The result is a powerful account of Brown's recent work.

Higher Education and Research in the European Union Despoina Anagnostopoulou, Dimitrios Skiadas, 2022-07-04 This interdisciplinary book consists of three parts which examine the European Union policies on research and innovation, education and life-long learning as well as the European Union Pillar on social rights and youth policies. In the first part, high-level experts analyze the European Research Area and its current enhancement with emphasis on mobility and employability of researchers, especially in times of crises. In the second part, the governance architecture of the European Education Area is explored, and the new objectives of the Bologna Process as well as the EU institutional framework of the recognition of skills and qualifications are analyzed. Life-long learning is also important for the individual development of human capital, especially for socially vulnerable people who could also benefit from literacy policies and skills development. The second part concludes with the evaluation of the EU education and training policy based on social indicators in the framework of the EU 2020 Strategy. In the third part, the book turns to Social Europe and the balancing between *ordo liberalism* and *ordo socialism*. It examines the EU Pillar of Social Rights and its

impact on youth policies It analyzes the EU youth policies e g on youth credit and their interaction with young people s employment and education possibilities with emphasis on the young people not in education employment or training NEETs

New Media and Learning in the 21st Century Tzu-Bin Lin, Victor Chen, Ching Sing Chai, 2015-02-25 This volume brings together conceptualizations and empirical studies that explore the socio cultural dimension of new media and its implications on learning in the 21st century classroom The authors articulate their vision of new media enhanced learning at a global level The high level concept is then re examined for different degrees of contextualization and localization for example how a specific form of new media e reader changes specific activities in different cultures In addition studies based in Singapore classrooms provide insights as to how these concepts are being transformed and implemented by a co constructive effort on the part of researchers teachers and students Singapore classrooms offer a unique environment to study the theory practice nexus in that they are high achieving implicitly grounded in the eastern cultural values and well equipped with ICT infrastructure While these studies are arguably the state of the art exemplars that synergize socio cultural and technological affordances of the current learning environments they also serve as improvable ideas for further innovations The interplay between theory and practice lends support to the reciprocal improvements for both This book contributes to the continuing debate in the field and will lead to better learning environments in the 21st century
