## L'univers 100 Questions Jean Pierre Luminet:

**Voyager dans un trou noir** Jean-Pierre Luminet, 2025-04-02 Trous noirs trous de ver trous blancs la théorie de la relativité gravitaire d'Einstein n'en finit pas de stimuler les spéculations les plus extravagantes sur les distorsions cosmiques et la possibilité de voyages spatio-temporels. Serait-il possible de plonger dans un trou noir pour emprunter le trou de ver correspondant et de ressortir par un trou blanc pour boucler en un temps record dans une région très lointaine de l'univers voire dans un univers parallèle? Le film de Christopher Nolan "Interstellar" imagine ainsi la possibilité pour l'humanité d'atteindre une Terre moribonde pour s'y installer sur une nouvelle planète accueillante. Ce film est-il crédible? Comment se comporte le temps autour d'un trou noir? A quoi ressemble les trous de ver? Sont-ils traversables? Qu'y a-t-il aux abords et à l'intérieur d'un trou noir? Comme le héros d'"Interstellar", embarquez avec Jean-Pierre Luminet pour un voyage au cœur des trous noirs, la découverte de ce que la science peut nous dire.

**El Universo improbable** Rafael Bachiller, 2019-10-02 Prólogo de Juan Luis Arsuaga. Cuales son los mayores retos con los que se presenta el planeta entre las mayores amenazas donde buscar la solución a los descomunales problemas con los que se enfrenta nuestra generación y las futuras. El origen y evolución del universo, la naturaleza del tiempo, la estructura de la materia, el infinito, las estrellas fugitivas, las ondas gravitacionales. Estos son algunos de los grandes temas que Rafael Bachiller, director del Observatorio Astronómico Nacional IGN, aborda en este libro tanto desde un punto de vista científico como desde una perspectiva filosófica y humanista. Todo lo que siempre ha querido saber sobre la vida y el cosmos.

**Ulugh Beg - L'astronome de Samarcande** Jean-Pierre Luminet, 2015-04-15 En 1429, Samarcande, escale majeure de la route de la soie, connaît une animation encore plus vive qu'à l'ordinaire. Le plus grand observatoire jamais construit vient d'être inauguré. Les ambassadeurs du monde vont contempler un immense sextant de 80 mètres de haut et 40 mètres de rayon, plongeant dans une fosse vertigineuse un gigantesque cadran solaire dont les parois externes sont couvertes d'une vaste fresque représentant le zodiaque et qui recèle les plus perfectionnés des instruments de mesure du temps et de l'espace : sphères armillaires, clepsydres, astrolabes. Le promoteur de ce prodige architectural, mais aussi le directeur de l'observatoire, n'est autre que le prince et gouverneur de Samarcande, Ulugh Beg, le petit fils du conquérant redoutable qui mit tout l'Orient feu de l'Indus au Jourdain. Tamerlan Amoureux des sciences et du ciel, père politique et militaire, ce qui lui vaudra sa mort. Ulugh Beg entouré des meilleurs astronomes de son temps va calculer la position de mille étoiles et rédiger un ouvrage majeur : les tables sultaniennes qui fascineront les savants, les religieux et les voyageurs du monde entier. C'est l'histoire totalement hors du commun de ce savant poétique et rigoureux que Jean-Pierre Luminet nous invite à découvrir dans une fresque romanesque, piquée au cœur d'un monde de grandes tendues d'histoires au raffinement incomparable et de guerres permanentes. Océaniquement, l'homme continue plus que jamais sa conquête de la science et des étoiles.
