My Search for a Diagnosis

"I want to give chronically ill patients the message that there is hope. You have little control over the fact that you have a certain disease, but you can control the way you respond to it, and that can strongly influence your ability to cope and to heal. You do have choices."

—From the Book

Elizabeth A. Klonoff, Hope Landrine

Lupus My Search For A Diagnosis:

Lupus Eileen Radziunas, 1989 The author recounts the years she spent searching for the correct diagnosis of her disease argues that more lupus research is needed and offers advice for those suffering from diseases that are difficult to diagnose

The Practice of Autonomy Carl Schneider, 1998 Exploring what patients do want gives direction to the author's inquiry into what they should want What patients want he believes is properly more complex and ambiguous than being empowered In this book he charts that ambiguity to take the autonomy principle past current pieties into the uncertain realities of the sick room and the hospital ward The Practice of Autonomy is a sympathetic but trenchant study of the animating principle of modern bioethics It speaks with freshness insight and even passion to bioethicists and moral philosophers about their theories to lawyers about their methods to medical sociologists about their subject to policy makers about their ambitions to doctors about their work and to patients about their lives **BOOK JACKET**

Preventing Misdiagnosis of Women Elizabeth A. Klonoff, Hope Landrine, 1997 Some clients don't respond to a therapist's chosen treatment for a specific mental disorder Could there be a physical disorder that is causing psychiatric symptoms How can a therapist distinguish between similar psychiatric and physical disorders to arrive at the correct diagnosis refer on and or suggest appropriate treatment Preventing Misdiagnosis of Women gives the therapist the foundation for identifying those physiological disorders that may be at the root of the mental problems presented by women clients Hyperthyroidism for example can result in depression and anxiety and temporal lobe epilepsy can manifest itself with the same symptoms as bipolar disorder This special guidebook sorts out potential mix ups by providing detailed cases and illustrations a quick reference table for checking symptoms and a glossary Making technical information clear and concise the authors cover endocrinological including thyroid adrenal pituitary and parathyroid systems and brain seizure problems as well as other diseases such as multiple sclerosis mitral heart valve prolapse and lupus erythematosus They offer a basic overview of the systems and organs involved and focus on how particular malfunctions can result in serious behavioral problems A guide to providing the best and most effective care to women clients Preventing Misdiagnosis of Women presents important information about assessment and interfacing with medical professionals All mental health and helping professionals will find this book invaluable as will students in clinical counseling psychology health psychology social work and gender studies

Spotlight on Gluten: New Symptoms for the New Millennium? Or Long-Standing Symptoms Now Being Recognized? Lucille Cholerton, 2012-02 Lucille Cholerton is a specialist in gluten sensitivity and coeliac disease She and her three grown children all suffer from gluten sensitivity Read her story in Spotlight on Gluten New symptoms for the new millennium Or long standing symptoms now being recognized Age is very pertinent to the subject of gluten sensitivity This disorder should really be diagnosed in childhood but if the diagnosis is missed people can suffer for many years with unexplained symptoms when something that they are eating every day could be the root cause of their ill health This book covers the symptoms that Cholerton and her children suffered and

how they improved their health dramatically on a gluten free diet The author s research spans twenty years In my research I discovered that gluten may be responsible for many autoimmune disorders of which there are some eighty eight documented My doctors knew nothing about this so I really had to be my own guinea pig A former teacher Lucille Cholerton is now a nutrition counselor and is writing her next books on gluten sensitivity There is a dire need for better diagnosis and understanding of this disorder She is married and lives in Durban South Africa She started the Gluten Intolerance Coeliac Support Group in Durban in 1995 For more information about gluten visit <http://www.allergysa.org> Publisher s website <http://sbpra.com> LucilleCholerton Author s Website <http://spotlightongluten.com> Speaking from the Body Angie

Chabram-Dernersesian, Adela de la Torre, 2008-11-20 In compelling first person accounts Latinas speak freely about dealing with serious health episodes as patients family caregivers or friends They show how the complex interweaving of gender class and race impacts the health status of Latinas and how family spirituality and culture affect the experience of illness Here are stories of Latinas living with conditions common to many hypertension breast cancer obesity diabetes depression osteoarthritis rheumatoid arthritis dementia Parkinson s lupus and hyper hypothyroidism By bringing these narratives out from the shadows of private lives they demonstrate how such ailments form part of the larger whole of Latina lives that encompasses family community the medical profession and society They show how personal identity and community intersect to affect the interpretation of illness compliance with treatment and the utilization of allopathic medicine alternative therapies and traditional healing practices The book also includes a retrospective analysis of the narratives and a discussion of Latina health issues and policy recommendations These Latina cultural narratives illustrate important aspects of the social contexts and real world family relationships crucial to understanding illness Speaking from the Body is a trailblazing collection of personal testimonies that integrates professional and personal perspectives and shows that our understanding of health remains incomplete if Latina cultural narratives are not included Reconstructing Illness Anne Hunsaker

Hawkins, 1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins s sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader Reconstructing Illness demonstrates that only when we hear both the doctor s and the patient s voice will we have a
