result of changing economic conditions on the other hand Since species adapted to open and semi open landscapes contribute to biodiversity in Europe in a major way this development is of great concern to nature conservation In several countries largescale nature adapted pastoral systems have been recognized as one solution to this problem These systems could offer an alternative to industrial livestock raising and keep a high biodiversity on the landscape level Against the background of livestock diseases such as BSE and Foot and Mouth Disease and the efforts to reform the Common Agricultural Policy in the EU by changing the criteria for agricultural subsidies these concepts gain particular significance They could also represent an alternative to the established costly habitat management tools **Microsoft flight simulator**
