Changing Regional Alliances for China and the West David Lane, Guichang Zhu, 2017-11-15 Since the end of the World War II nation states have formed regions to give them some protection from the processes of globalization and internationalization Against this background the contributors consider the position of China in the processes of regional competitive interdependency This book offers analysis at three levels internal regional and global Chapters consider China's position in regional post socialist associations such as the BRICS the Shanghai Cooperation Organization SCO the Eurasian Economic Union EEU the Silk Road Economic Belt and the One Belt One Road OBOR Contributors discuss how membership in these regional bodies is likely to enhance China's economic power strategic position and political importance A major theme addressed is whether these new powers will become complementary to the American led economic core countries or evolve as countervailing powers Contributors suggest that linkages favored by China's regional associations are more network based and informal in character They are more in keeping with regionalization rather than regional blocs such as the European Union which have locked in members to market driven institutions Thus these new developments move away from a neo liberal market perspective and satisfy the needs of members to retain their economic and political sovereignty This book considers whether these new regional blocs led by China will perform a transformative process for the international order or become an alternative supplementary to but not replacing the existing institutions of the North An important topic is the relationship of Russia and China to the Central Asian countries of the former USSR and the interaction between the Russia led Eurasian Economic Union and the Chinese initiative of the Silk Road Economic Belt There is potential for the evolution of an alliance between China and Russia against the neo liberal order led by the USA Concurrently they bring out possible tensions between Russia's and China's conflicting interests over influence in Central Asia Reactions to China's rise include the Trump administration's movement from a multilateral to a bi lateral trade policy and the threat of discriminatory tariffs for China The contributors seek to promote a better appreciation of China's role in regional associations and the implications of contemporary developments in economic geo political and international political affairs in the 21st century
