students have access to these kinds of learning environments In Segregation by Experience the authors filmed and studied a first grade classroom led by a Black immigrant teacher who encouraged her diverse group of students to exercise their agency When the researchers showed the film to other schools everyone struggled Educators admired the teacher but didn't think her practices would work with their own Black and brown students Parents of color many of them immigrants liked many of the practices but worried that they would compromise their children And the young children who viewed the film thought that the kids in the film were terrible loud and badly behaved they told the authors that learning was supposed to be quiet still and obedient In Segregation by Experience Jennifer Keys Adair and Kiyomi Sanchez Suzuki Colegrove show us just how much our expectations of children of color affect what and how they learn at school and they ask us to consider which children get to have sophisticated dynamic learning experiences at school and which children are denied such experiences because of our continued racist assumptions about them
