The Dragon in the Cockpit Hung Sying Jing, Allen
 Batteau, 2016-03-23 The purpose of The Dragon in the Cockpit is to enhance the mutual understanding between Western
 aviation human factors practitioners and the Chinese aviation community by describing some of the fundamental Chinese
 cultural characteristics pertinent to the field of flight safety China s demand for air transportation is widely expected to
 increase further and the Chinese aviation community are now also designing their own commercial aircraft the COMAC C
 919 Consequently the interactions in the air between the West and China are anticipated to become far more extensive and
 dynamic However due to the multi faceted nature of Chinese culture it is sometimes difficult for Westerners to understand
 Chinese thought and ways sometimes to the detriment of aviation safety This book provides crucial insights into Chinese
 culture and how it manifests itself during flight operations as well as highlighting ways in which Western technology and
 Chinese culture clash within the cockpit Science and technology studies STS have demonstrated that sophisticated
 technologies embed cultural assumptions usually in subtle ways These cultural assumptions bite back when the technology is
 used in an unfamiliar cultural context By creating the insider s perspective on the cultural technological assumptions of the
 world s fastest growing industrial economy this book seeks to minimize the accidents and damage resulting from
 technological cultural misunderstandings and misperceptions
