Science Cultures in a Diverse World: Knowing, Sharing, Caring Bernard Schiele, Xuan Liu, Martin W. Bauer, 2021-09-13 Science and technology culture is now more than ever at the very heart of the social project and all countries to varying degrees participate in it raising scientific literacy improving the image of the sciences involving the public in debates and encouraging the young to pursue careers in the sciences Thus the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture accessible for participation not only to the few who by virtue of their training or trade work in the science and technology fields but to all thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices This book organized on the theme of knowing sharing caring new insights for a diverse world which was derived from the observation that globalization rests upon diversity diversity of contexts public research strategies and new innovating practices and aims to stimulate exchanges discussions and debates to initiate a reflection conducive to decentring and to be an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors the challenges they perceive and the potential solutions they consider Thus this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so In this spirit however significant the results presented and shared are less important than the questions they seek to answer How are we to rethink the diffusion the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world What to know What to share How do we do it when science is broken down across the whole spectrum of the world's diversity The book is recommended for those who are interested in science communication and science cultures in the new media era in contemporary social dynamics and in the evolution of the role of the state and of institutions It is also an excellent reference for researchers engaging in science communication public understanding of science cultural studies science and technology museum science society relationship and other fields of humanities and social sciences

New Perspectives on the History of Life Sciences and Agriculture Denise Phillips, Sharon Kingsland, 2015-02-12 This volume explores problems in the history of science at the intersection of life sciences and agriculture from the mid-eighteenth to the mid-twentieth century Taking a comparative national perspective the book examines agricultural practices in a broad sense including the practices and disciplines devoted to land

management forestry soil science and the improvement and management of crops and livestock The life sciences considered include genetics microbiology ecology entomology forestry and deal with US European Russian Japanese Indonesian Chinese contexts The book shows that the investigation of the border zone of life sciences and agriculture raises many interesting questions about how science develops In particular it challenges one to re examine and take seriously the intimate connection between scientific development and the practical goals of managing and improving perhaps even recreating the living world to serve human ends Without close attention to this zone it is not possible to understand the emergence of new disciplines and transformation of old disciplines to evaluate the role and impact of such major figures of science as Humboldt and Mendel or to appreciate how much of the history of modern biology has been driven by national ambitions and imperialist expansion in competition with rival nations

A Local Perspective on Lexicography Marinela Burada,Raluca Sinu,2020-05-04 This book is concerned with dictionary making and dictionary research carried out in Romania The outcome of extensive hands on experience in dictionary making and dictionary research the volume addresses a range of culture specific topics related to both dictionary as process and dictionary as product It reflects the interests and concerns of all the stakeholders on the lexicographic continuum theorists practitioners and dictionary users The topics covered here encompass a number of macro and micro structural aspects relating to paper and online monolingual and bilingual general and specialized reference works They create a composite picture of the lexicographic landscape in Romania set against a wider sociocultural backdrop It is this ecology of dictionary making that helps explain the priorities influences pressures and challenges that have shaped the local dictionary culture The book will also provide researchers practitioners teachers and students with a clearer view of the peculiarities of the dictionary

Poincaré, Philosopher of Science María de Paz,Robert DiSalle,2014-04-11 This volume presents a selection of papers from the Poincar Project of the Center for the Philosophy of Science University of Lisbon bringing together an international group of scholars with new assessments of Henri Poincar s philosophy of science both its historical impact on the foundations of science and mathematics and its relevance to contemporary philosophical inquiry The work of Poincar 1854 1912 extends over many fields within mathematics and mathematical physics But his scientific work was inseparable from his groundbreaking philosophical reflections and the scientific ferment in which he participated was inseparable from the philosophical controversies in which he played a pre eminent part The subsequent history of the mathematical sciences was profoundly influenced by Poincar s philosophical analyses of the relations between and among mathematics logic and physics and more generally the relations between formal structures and the world of experience The papers in this collection illuminate Poincar s place within his own historical context as well as the implications of his work for ours

Science after the Practice Turn in the Philosophy, History, and Social Studies of Science Léna Soler,Sjoerd Zwart,Michael Lynch,Vincent Israel-Jost,2014-03-21 In the 1980s philosophical historical and social studies of science underwent a change which later evolved into a turn to practice Analysts of science

were asked to pay attention to scientific practices in meticulous detail and along multiple dimensions including the material social and psychological. Following this turn, the interest in scientific practices continued to increase and had an indelible influence in the various fields of science studies. No doubt the practice turn changed our conceptions and approaches of science but what did it really teach us? What does it mean to study scientific practices? What are the general lessons, implications and new challenges? This volume explores questions about the practice turn using both case studies and theoretical analysis. The case studies examine empirical and mathematical sciences including the engineering sciences. The volume promotes interactions between acknowledged experts from different, often thought of as conflicting, orientations. It presents contributions in conjunction with critical commentaries that put the theses and assumptions of the former in perspective. Overall, the book offers a unique and diverse range of perspectives on the meanings, methods, lessons and challenges associated with the practice turn.

The Theory of Mind Under Scrutiny Teresa Lopez-Soto, Alvaro Garcia-Lopez, Francisco J. Salguero-Lamillar, 2024-01-01. This book is a call to expand and diversify our approach to the study of the human mind in relation to the Theory of Mind. It proposes that it is necessary to combine cross disciplinary methods to arrive at a more complete understanding of how our minds work. Seeking to expand the discussion surrounding the Theory of Mind beyond the field of psychology and its focus on our capacity to ascribe mental states to other people, this volume collects evidence and research to point to a more holistic understanding of our own minds, the minds of others, behavior, language and reasoning. This book therefore illuminates the conceptual intricacy underlying the Theory of Mind. It posits that a wide scope is necessary to make a breakthrough in scientific research towards a full understanding of the nature, function and development of our capacity to converge on biological processes of the brain towards consciousness, emotion, awareness and cognition. The volume presents methods, results, critiques and models intended to provoke debates in various academic disciplines. It is of interest to scholars working in psychology, neuroscience, philosophy of mind and artificial intelligence.

Thinking with Women Philosophers Eléonore Le Jallé, Audrey Benoit, 2022-10-03. This book focuses on some English speaking women philosophers who have been major actors since the 20th century in the field of practical philosophy, namely political and social philosophy, feminist approaches to philosophy, moral psychology, the theory of action and ethics. The book explores topics linked to the main aspects of the thought of those philosophers: i.e. Elizabeth Anscombe, Judith Butler, Philippa Foot, Nancy Fraser, Carol Gilligan and Martha Nussbaum. Six women French commentators have written a chapter on each of those women, anglo-american philosophers, creating a dialogue as they think with them, elaborating their own positions in their respective fields.

La correspondance de jeunesse d'Henri Poincaré Laurent Rollet, 2017-05-22. Ce cinquième volume de la correspondance d'Henri Poincaré rassemble l'ensemble des lettres envoyées par le mathématicien à sa famille durant ses années de formation: l'école polytechnique puis l'école des mines de Paris. De 1873 à 1878, Poincaré écrit plus de 300 lettres à sa mère et son père. Une part importante de cette correspondance concerne ses études pour devenir ingénieur. Poincaré vogue

ainsi les différents événements importants ou anodins qui ponctuent son parcours de formation dans les deux écoles les cours et les examens les voyages d'études en France et l'étranger les relations avec les professeurs les rituels étudiants la naissance de ses ambitions mathématiques Cependant ces lettres de jeunesse permettent également de reconstituer les réseaux familiaux et amicaux de Poincaré ainsi que l'univers socio-culturel dans lequel il évolue dans les années 1870 Elles fourmillent donc de récits pittoresques sur ses visites mondaines sur ses relations avec sa sœur ou ses amis d'enfance sur ses loisirs ou sur ses convictions politiques Ce corpus de lettres est constitué presque intégralement de lettres écrites par Poincaré et leur lecture permet de découvrir un autoportrait inédit et saisissant du futur mathématicien Il intéressera autant les historiens des mathématiques que les biographes de Poincaré les historiens de l'enseignement ou le grand public

Women's Contemporary Readings of Medieval (and Modern) Arabic Philosophy Saloua Chatti, 2022-06-27 This book explores a large variety of topics involved in Arabic philosophy It examines concepts and issues relating to logic and mathematics as well as metaphysics ethics and aesthetics These topics are all studied by different Arabic philosophers and scientists from different periods ranging from the 9th century to the 20th century and are representative of the Arabic tradition This is the first book dealing with the Arabic thought and philosophy and written only by women The book brings together the work and contributions of an international group of female scholars and researchers specialized in the history of Arabic logic philosophy and mathematics Although all authors are women the book does not enter into any kind of feminist trend It simply highlights the contributions of female scholars in order to make them available to the large community of researchers interested in Arabic philosophy and to bring to the fore the presence and representativeness of female scholars in the field

Arsyad al-Banjari's Insights on Parallel Reasoning and Dialectic in Law Muhammad Iqbal, 2022-06-16 This book provides an epistemological study of the great Islamic scholar of Banjarese origin Syekh Muhammad Arsyad al-Banjari 1710-1812 who contributed to the development of Islam in Indonesia and in general Southeast Asia The work focuses on Arsyad al-Banjari's dialectical use and understanding of *qiyās* or correlational inference as a model of parallel reasoning or analogy in Islamic jurisprudence This constituted the most prominent instrument he applied in his effort of integrating Islamic law into the Banjarese society This work studies how Arsyad al-Banjari integrates *jadāl* theory or dialectic in Islamic jurisprudence within his application of *qiyās* The author develops a framework for *qiyās* which acts as the interface between *jadāl* dialogical logic and Per Martin Laff's Constructive Type Theory CTT One of the epistemological results emerging from the present study is that the different forms of *qiyās* applied by Arsyad al-Banjari represent an innovative and sophisticated form of reasoning The volume is divided into three parts that discuss the types of *qiyās* as well their dialectical and argumentative aspects historical background and context of Banjar and demonstrates how the theory of *qiyās* comes quite close to the contemporary model of parallel reasoning for sciences and mathematics developed by Paul Bartha 2010 This volume will be of interest to historians and philosophers in general and logicians and historians of philosophy in particular

Theory and Practice in

the Interdisciplinary Production and Reproduction of Scientific Knowledge Olga Pombo, Klaus Gärtner, Jorge Jesuino, 2023-01-10 This book addresses the urgent need for a large and systematic analysis of current interdisciplinary ID research and practice It demonstrates how ID is essentially a cognitive phenomenon something different from the frivolous and inconsequential attempt of trying to overcome the disciplinary competencies and exigencies By ID the authors show that it is a manifestation of the transversal rationality that underlies current scientific activity It is the very progress of specialized disciplines that requires interdisciplinary new research practices and new forms of articulation between domains something that has a strong impact on the traditional disciplinary structure of scientific and educational institutions Divided into two parts the book presents a conceptual framework as well as several case studies on ID practices The book aims at covering three main themes It contributes to the stabilization of ID meaning and characterizes the main ID theorizations which have been proposed until now It builds an innovative and broad understanding of the several ID determinations as an essentially cognitive phenomenon and of its institutional implications at the level of disciplinary structures and curricular organization Finally it distinguishes and maps the diversity of ID procedures and practices which are being used and tested by contemporary scientific and educational institutions This book is addressed to philosophers scientists and every one interested in science production and reproduction including science teaching

Applying Reflective Equilibrium Tanja Rechnitzer, 2022-07-01 This open access book provides the first explicit case study for an application of the method of reflective equilibrium RE using it to develop and defend a precautionary principle It thereby makes an important and original contribution to questions of philosophical method and methodology The book shows step by step how RE is applied and develops a methodological framework which will be useful for everyone who wishes to use reflective equilibrium With respect to precautionary principles the book demonstrates how a rights based precautionary principle can be constructed and defended The case study succeeds in demonstrating that RE can be successfully applied and puts real constraints on the justification process This is all the more remarkable as the case study was designed as an open ended process without presupposing any specific results This book will be highly relevant both to people interested in philosophical methodology and epistemology as well as to researchers who are interested in using philosophical methods and tools and applying them to practical problems

The War of Guns and Mathematics David Aubin, Catherine Goldstein, 2014-10-07 For a long time World War I has been shortchanged by the historiography of science Until recently World War II was usually considered as the defining event for the formation of the modern relationship between science and society In this context the effects of the First World War by contrast were often limited to the massive deaths of promising young scientists By focusing on a few key places Paris Cambridge Rome Chicago and others the present book gathers studies representing a broad spectrum of positions adopted by mathematicians about the conflict from militant pacifism to military scientific or ideological mobilization The use of mathematics for war is thoroughly examined This book suggests a new vision of the long term influence of World

War I on mathematics and mathematicians Continuities and discontinuities in the structure and organization of the mathematical sciences are discussed as well as their images in various milieux Topics of research and the values with which they were defended are scrutinized This book in particular proposes a more in depth evaluation of the issue of modernity and modernization in mathematics The issue of scientific international relations after the war is revisited by a close look at the situation in a few Allied countries France Britain Italy and the USA The historiography has emphasized the place of Germany as the leading mathematical country before WWI and the absurdity of its postwar ostracism by the Allies The studies presented here help explain how dramatically different prewar situations prolonged interaction during the war and new international postwar organizations led to attempts at redrafting models for mathematical developments **Discoverability**

Lorenzo Magnani, 2022-05-20 The book analyses the concept of discoverability and some current epistemological problems related to it with a special attention to science It shows that discoverability is closely related to the sustainability of human creativity in an eco cognitive perspective Advocating the need of an integral ecology and leveraging the important concept of abduction it demonstrates that an ecology of human creativity should have priority over other needs i e that the first ecological duty is to protect and sustain discoverability Enhancing discoverability will protect human creativity and it is exactly human creativity a form of innovative abductive cognition that can promote the implementation of the other kinds of ecology The author guides readers through a comprehensive discussion on the concept of discoverability eco cognitive situatedness and eco cognitive openness and closure alike By describing some key real world examples he highlights the main challenges that are currently posed to human creativity and epistemic integrity He also describes future eco cognitive settings discussing the problem of overcomputationalism and suggesting a reinterpretation of the role of human knowledge Overall this book fills an important gap in the literature on the nexus abduction creativity discovery offering a source of inspiration to philosophers epistemologists and cognitive scientists Yet it also addresses researchers in other disciplines interested in the problems of scientific discovery and epistemic integrity of research *The Jacobites and the Grand Tour*

Jérémy Filet, 2025-04-22 In the first monograph to fully examine the intersecting networks of Jacobites and travellers to the continent Filet considers how small states used official diplomacy and deployed soft power embodied by educational academies to achieve foreign policy goals This work uses little known archival materials to explain how and why certain small states secretly supported the Jacobite cause during the crucial years surrounding the 1715 rising while others stayed out of Jacobite affairs At the same time the book demonstrates how early modern small states sought to cultivate good relations with Britain by attracting travellers as part of a wider trend of ensuring connections with future diplomats or politicians in case a Stuart restoration never came This publication therefore brings together a study of Britain small states Jacobitism and educational travel in its nexus at continental academies *The Meaning of Something* Fosca Mariani Zini, 2022-11-09 This innovative volume investigates the meaning of something in different recent philosophical traditions in order to rethink the

logic and the unity of ontology without forgetting to compare these views to earlier significative accounts in the history of philosophy In fact the revival of interest in something in the 19th and 20th centuries as well as in contemporary philosophy can easily be accounted for it affords the possibility for asking the question what is there without engaging in predefined speculative assumptions The issue about something seems to avoid any naive approach to the question about what there is so that it is treated in two main contemporary philosophical trends material ontology which aims at taking inventory of what there is of everything that is and formal ontology which analyses the structural features of all there is whatever it is The volume advances cutting edge debates on what is the first et the most general item in ontology that is to say something because the relevant features of the conceptual core of something are non nothingness otherness Something means that one being is different from others The relationality belongs to something Therefore the volume advances cutting edge debates in phenomenology analytic philosophy formal and material ontology traditional metaphysics
