conceptual framework derives from the System of National Accounts 1993 and recent developments in index number theory. Preparation of the Manual was undertaken by the Intersecretariat Working Group on Price Statistics through a technical expert group chaired by the IMF and involving representatives from the ILO, the OECD, the UN Economic Commission for Europe, the World Bank, national statistical offices and academic institutions.

[Economic Sanctions](#) R. Eyler, 2007-12-09 This book looks at economic sanctions using a political economy foundation. The author investigates the effectiveness of sanctions and the human suffering caused by them from a political and economic vantage, addressing political decisions, case studies, and game theory explanations, as well as discussing the future of sanctions as statecraft.

[Votes, Money, And The Clinton Impeachment](#) Irwin Morris, 2018-03-09 In the first in-depth examination of politics of the Clinton impeachment, Morris looks at the impact of local constituencies on impeachment rather than the popular press focus on partisan animosity and ethical standards. Though most legislators sided with their constituents on the issue of impeachment, a significant number, nearly all Republicans, did not. Using the most recent work on the impact of money on elections, Morris investigates the financial dynamics of the Clinton impeachment and argues that our current system of campaign finance enabled House Republicans to impeach the President and provided them with the means to retain their majority in the House. Morris also argues that money and the ability to raise it play a far more important role in the American political system than previously realized, often determining the winners and losers in the most important controversies and conflicts facing the nation.

Research Methods in Practice Dahlia K. Remler, Gregg G. Van Ryzin, 2021-08-24 Thoroughly updated to reflect changes in both research and methods, this Third Edition of Remler and Van Ryzin's innovative standard-setting text is imbued with a deep commitment to making social and policy research methods accessible and meaningful. *Research Methods in Practice: Strategies for Description and Causation* motivates readers to examine the logic and limits of social science research from academic journals and government reports. A central theme of causation versus description runs through the text, emphasizing the idea that causal research is essential to understanding the origins of social problems and their potential solutions. Readers will find excitement in the research experience as the best hope for improving the world in which we live, while also acknowledging the trade-offs and uncertainties in real-world research.

[Brain Korea 21 Phase II](#), 2008 The Brain Korea 21 Program (BK21), which seeks to make Korean research universities globally competitive and to produce more high-quality researchers in Korea, provides funding to graduate students and professors who belong to research groups at top universities. The authors develop quantitative and qualitative models to evaluate how well BK21 is fulfilling its goals and make suggestions for further stimulating Korean university research.
