The State of Energy Efficiency in Canada Canada. Office of Energy Efficiency, 2004

Biocarburants, les temps changent ! Helga-Jane Scarwell, 2007-06-05 L'observation et l'analyse rapide d'un certain nombre d'arguments récurrents relatifs au développement des biocarburants posent toutefois la question de leur pertinence au regard des enjeux d'un développement durable et de leur capacité elle faire valuer en profondeur les politiques publiques travers le prisme des biocarburants petit changement d'une politique publique plus globale nous percevons qu'il conviendrait d'élargir le débat afin de promouvoir une politique plus large prenant en compte toute la complexité de la problématique sous-jacente Toutes les solutions techniques voquées en vue de l'adaptation au changement climatique ou au nouveau contexte énergétique ne trouvent leur justification que dans une économie de la sobriété Ne vaut-il pas mieux commencer par faire de sérieuses économies d'énergie pour s'affranchir du piège que de tout miser sur un piège vert qui sera justement d'autant plus intéressant en proportion de la consommation que cette dernière aura commencé par sérieusement baisser avant Par ailleurs les questions environnementales appellent des réponses globales et non pas des réponses partielles qui sont prisonnières de la promotion d'un seul type d'acteurs L'avenir de la planète concerne de nombreux acteurs situés différentes échelles d'intervention ils doivent essayer de construire des politiques cohérentes même si l'absence d'une gouvernance mondiale se fait cruellement sentir L'essentiel tant de ne pas faire la promotion d'une solution qui transfère les problèmes vers d'autres domaines Ainsi les économies d'énergie domestiques au moment des crises pétrolières se sont souvent traduites par une détérioration de la qualité de l'air intérieur puisque la ventilation avait tendance à augmenter Les biocarburants ne pourront jamais totalement se substituer aux énergies fossiles leur développement sans négliger les innovations technologiques indispensables est donc assujéti une économie de la sobriété dont seuls les individus et les collectivités locales tiennent les clés
