the way we do business is ever more dominated by electronic exchanges of information Is our technology ready for the open market of networks and services Can we manage the growing complexity of computing and telecommunications technology and place it at the service of the people The challenge for the research community is to develop the tools and techniques that will ultimately bring the full power of communications and information to everyone in a way that everyone can easily use The Sixth International Conference on Intelligence in Services and Networks IS N 99 is all about technology for paving the way to the open services market Since the first IS N conference in 1992 the focus of the IS N program has continually shifted We see existing technologies maturing while new ones emerge but the bottom line has always been putting technology at the service of the people

*Management of Multimedia Networks and Services* Alan Marshall, Nazim Agoulmine, 2003-09-09. Welcome to MMNS 2003. Multimedia services over IP networks are proliferating at an enormous speed. There is also increasing demand for solutions that provide assured levels of service quality. All of these require novel paradigms, models and architectures for realizing integrated end-to-end service management rather than managing network elements in isolation. Providing scalable Quality of Service (QoS) while maintaining fairness along with secure and optimal network resource management are key challenges for the future Internet. These challenges apply to both wired and wireless networks. This book contains all of the papers presented at the 6th IFIP IEEE International Conference on Management of Multimedia Networks and Services MMNS 2003 hosted by The Queen's University of Belfast Northern Ireland September 7-10 2003. MMNS 2003 follows the successful conferences held in Santa Barbara 2002, Chicago 2001, Fortaleza Brazil 2000, Paris 1998 and Montreal 1997. MMNS uses single track presentations which provide an intimate setting for discussion and debate. The conference is known for its high quality papers from various research communities. In just six years MMNS has established itself as one of the premier conferences focusing on the management of multimedia networks and services. The conference objective is to bring together researchers working in all facets of network and service management as applied to broadband networks and multimedia services.
