This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries **Towards Net Zero Carbon Emissions in the Building Industry** Ali Sayigh,2022-11-08 Towards Net Zero in the Building Industry looks at the contributions that the building and construction industry can and must make to help achieve net zero carbon emissions The

building industry accounts for close to 40% of global emissions and this book brings together a global group of contributors from 15 countries to examine ways in which the industry can help with overall CO2 reduction Coverage includes factors such as building design strategy materials selection use of local materials with a low carbon imprint renewable energy use energy conservation greenery and appropriate aesthetics building size and scale climate suitability building functionality and comfort material recycling and adoption of green policies Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link springer.com

The Green Fiscal Mechanism and Reform for Low Carbon Development Akihisa Mori, Paul Ekins, Stefan Speck, Soo-Cheol Lee, Kazuhiro Ueta, 2013-10-30 This book reviews how far East Asian nations have implemented green fiscal reform and show how they can advance carbon energy tax reform to realize low carbon development with special reference to European policy and experience East Asian nations are learning European experiences to adopt them in their political economic and institutional contexts However implementation has been slow in practice partly due to low acceptability that comes from the same concerns as in Europe and partly due to weak institutional arrangements for the reform The slow progress in the revenue side turns our eyes on expenditure side how East Asian nations have increased environmental related expenditures and how far they have greened sectorial expenditures This lifecycle assessment of the fiscal reform coupled with the assessment of the institutional arrangement constitutes the features of this book The book helps to provide overall picture of green fiscal reform and carbon energy tax reform in the East Asian region The region has a variety of countries from lowest income to high income nations Nations have different interests in substance and barriers for reform This book covers recent development of environmental fiscal reform and carbon energy taxation in wider nations in the region including South Korea Taiwan Thailand Vietnam Indonesia and Japan In addition the book's holistic view helps to understand why a specific nation has interest and concern on some aspects of the reforms

The New Carbon Architecture Bruce King, 2017-12-05 Soak up carbon into beautiful healthy buildings that heal the climate Green buildings that slash energy use and carbon emissions are all the rage but they aren't enough The hidden culprit is embodied carbon the carbon emitted when materials are mined manufactured and transported comprising some 10% of global emissions With the built environment doubling by 2030 buildings are a carbon juggernaut threatening to overwhelm the climate It doesn't have to be this way Like never before in history buildings can become part of the climate solution With biomimicry and innovation we can pull huge amounts of carbon out of the atmosphere and lock it up as walls roofs foundations and insulation We can literally make buildings out of the sky with a massive positive impact The New Carbon Architecture is a paradigm shifting tour of the innovations in architecture and construction that are making this happen Office towers built from advanced wood products affordable low carbon concrete alternatives plastic cleaned from the oceans and turned into building blocks We can even grow insulation from mycelium A tour de force by the leaders in the field The New Carbon Architecture will fire the imagination of architects engineers builders policy makers and everyone else

captivated by the possibility of architecture to heal the climate and produce safer healthier and more beautiful buildings

Green and Low Carbon Built Environment Ashok Kumar Jain, 2023-04-26 This book constitutes state of the art research covering a wide range of topics including climate change and carbon emissions air quality and pollution control urbanism land and circular economy sustainable transport energy water biodiversity and greenery environmental services housing and construction with respect to the built environment The concepts of sustainability in built environment conclude with reimagining the city The content includes pedagogical features such as examples simple flowing language and over 100 figures The book aims to motivate architects engineers consultants builders and planners to respond to the challenges of sustainability in the built environment **Zero-carbon Homes** Joanna Williams, 2013-04-15 Housing is a major contributor

to CO₂ emissions in Europe and America today and the construction of new homes offers an opportunity to address this issue

Providing homes that achieve zero carbon carbon neutral zero net energy or energy plus standard is becoming the goal of more innovative house builders globally whilst energy providers seek to decarbonise the energy supply to new and existing development Various new technical systems for achieving these goals are beginning to emerge For example the passive house whose energy requirement for space heating and cooling is almost zero the smart grid that has revolutionized the management of energy whilst enabling the connection of small scale renewable energy producers and electric vehicles to the grid or the European super grid which will enable zero carbon energy to be generated in the Sahara desert and stored in Norway This book explores the diverse approaches that are being adopted around the world to deliver zero carbon homes and the different societal systems and geographic circumstances in which they have developed It postulates a roadmap for delivering zero carbon homes together with a toolbox approach for policy and practice to suit particular national and local circumstances A series of case studies are presented that offer lessons for delivering zero carbon homes These examples are also used to demonstrate how prototype systems can move into the mainstream The book highlights some of the instruments and mechanisms that could be used to support this transformation and addresses the wider implications of introducing these innovative systems in terms of industry lifestyle and urban form

The Top Books of the Year Low Energy Carbon Architecture Developments The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. Low Energy Carbon Architecture Developments : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Low Energy Carbon Architecture Developments : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
