Targeted Interventions for Student Success in Online Courses Glick, Danny, Cohen, Anat, Chang, Chi, 2020-06-26 Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face to face teaching such as overcrowded classrooms and shortage of certified teachers While online learning has been recognized as a possible approach to deliver more desirable learning outcomes close to half of online students drop out as a result of student related course related and out of school related factors e g poor self regulation ineffective teacher student student student and platform student interactions low household income Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason A well implemented early warning system

therefore can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation Despite the popularity of early warning systems research on their design and implementation is sparse Early Warning Systems and Targeted Interventions for Student Success in Online Courses is a cutting edge research publication that examines current theoretical frameworks research projects and empirical studies related to the design implementation and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice Moreover this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and therefore more actionable Highlighting a range of topics such as curriculum design game based learning and learning support it is ideal for academicians policymakers administrators researchers education professionals instructional designers data analysts and students

The Dragon in the Cockpit Hung Sying Jing, Allen Batteau, 2016-03-23 The purpose of *The Dragon in the Cockpit* is to enhance the mutual understanding between Western aviation human factors practitioners and the Chinese aviation community by describing some of the fundamental Chinese cultural characteristics pertinent to the field of flight safety China s demand for air transportation is widely expected to increase further and the Chinese aviation community are now also designing their own commercial aircraft the COMAC C 919 Consequently the interactions in the air between the West and China are anticipated to become far more extensive and dynamic However due to the multi faceted nature of Chinese culture it is sometimes difficult for Westerners to understand Chinese thought and ways sometimes to the detriment of aviation safety This book provides crucial insights into Chinese culture and how it manifests itself during flight operations as well as highlighting ways in which Western technology and Chinese culture clash within the cockpit Science and technology studies STS have demonstrated that sophisticated technologies embed cultural assumptions usually in subtle ways These cultural assumptions bite back when the technology is used in an unfamiliar cultural context By creating the insider s perspective on the cultural technological assumptions of the world s fastest growing industrial economy this book seeks to minimize the accidents and damage resulting from technological cultural misunderstandings and misperceptions

Smart Driver Training Simulation Wolf Dieter K ppler, 2008-07-02 A good decade after the temporary end of attempts to

make driving simulation into an accepted productive teaching and training technology new possibilities and chances are on the horizon motivated by current EU legislation The author has been involved in terms of technology and content in the development of driving simulators and has tracked their progress This book attempts to take driving simulation seriously as a technology for teaching and training to demonstrate possible paths for future development and to promote the formation of a community as a basis for future success The author would like to thank all the institutions companies and universities involved for providing him with material and for their constant willingness to discuss matters Special thanks go to Prof R Bernotat and the Research Establishment for Applied Sciences Forschungsgesellschaft für Angewandte Naturwissenschaften e V in Wachtberg Prof H P Willumeit and Berlin University of Technology and all staff and students for the years of factual financial technological and personal support On behalf of the above I would like to thank the translator Anne Koth Although the masculine gender has been chosen in the text for convenience the information applies equally to the feminine gender

Manual of Simulation in Healthcare Richard H. Riley, 2015-10-29 Practising fundamental patient care skills and techniques is essential to the development of trainees wider competencies in all medical specialties After the success of simulation learning techniques used in other industries such as aviation this approach has been adopted into medical education This book assists novice and experienced teachers in each of these fields to develop a teaching framework that incorporates simulation The Manual of Simulation in Healthcare Second Edition is fully revised and updated New material includes a greater emphasis on patient safety interprofessional education and a more descriptive illustration of simulation in the areas of education acute care medicine and aviation Divided into three sections it ranges from the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development to the considerations for healthcare centred simulation within medical education and the steps required to develop courses that comply with best practice in medical education Providing an in depth understanding of how medical educators can best incorporate simulation teaching methodologies into their curricula this book is an invaluable resource to teachers across all medical specialties

Hostage Negotiation Manual Edenilson Brandl, This book is an important guide for a number of professions including police officers military personnel special forces firefighters journalists and security agents It is also highly relevant for those in the fields of diplomacy law education and social work The book aims to serve as a detailed and technical resource suitable for both beginners and experienced professionals in this complex field The manual is unique in that it integrates knowledge from various disciplines including psychology engineering and pedagogy to create a holistic approach It emphasizes that crisis management is an evolving field that requires not only specific technical skills but also a solid foundation in human psychology and ethical principles The author encourages the reader to see the text as a tool for professional development a resource that bridges theoretical knowledge with practical application It highlights the importance of continuous learning

and interdisciplinary collaboration to master the art of resolving critical situations and it serves as a call to action for professionals to prepare for the challenges of an interconnected world **Pan Am Pioneer** Sanford B. Kauffman, 1995

Fascinating story of the growth of a new industry a legendary American business and a pioneering spirit **Safety at the Sharp End** Rhona Flin, Paul O'Connor, 2017-05-15

Many 21st century operations are characterised by teams of workers dealing with significant risks and complex technology in competitive commercially driven environments Informed managers in such sectors have realised the necessity of understanding the human dimension to their operations if they hope to improve production and safety performance While organisational safety culture is a key determinant of workplace safety it is also essential to focus on the non technical skills of the system operators based at the sharp end of the organisation These skills are the cognitive and social skills required for efficient and safe operations often termed Crew Resource Management CRM skills In industries such as civil aviation it has long been appreciated that the majority of accidents could have been prevented if better non technical skills had been demonstrated by personnel operating and maintaining the system As a result the aviation industry has pioneered the development of CRM training Many other organisations are now introducing non technical skills training most notably within the healthcare sector

Safety at the Sharp End is a general guide to the theory and practice of non technical skills for safety It covers the identification training and evaluation of non technical skills and has been written for use by individuals who are studying or training these skills on CRM and other safety or human factors courses The material is also suitable for undergraduate and post experience students studying human factors or industrial safety programmes **Interfaces** , 1999
