Mattering Victoria Pitts-Taylor, 2016-08-30 Feminists today are re imagining nature biology and matter in feminist thought and critically addressing new developments in biology physics neuroscience epigenetics and other scientific disciplines Mattering edited by noted feminist scholar Victoria Pitts Taylor presents contemporary feminist perspectives on the materialist or naturalizing turn in feminist theory and also represents the newest wave of feminist engagement with science The volume addresses the relationship between human corporeality and subjectivity questions and redefines the boundaries of human non human and nature culture elaborates on the entanglements of matter knowledge and practice and addresses biological materialization as

a complex and open process This volume insists that feminist theory can take matter and biology seriously while also accounting for power taking materialism as a point of departure to rethink key feminist issues The contributors an international group of feminist theorists scientists and scholars apply concepts in contemporary materialist feminism to examine an array of topics in science biotechnology biopolitics and bioethics These include neuralplasticity and the brain machine interface the use of biometrical identification technologies for transnational border control epigenetics and the intergenerational transmission of the health effects of social stigma ADHD and neuropharmacology and randomized controlled trials of HIV drugs A unique and interdisciplinary collection Mattering presents in grounded concrete terms the need for rethinking disciplinary boundaries and research methodologies in light of the shifts in feminist theorizing and transformations in the sciences

Gendered Bodies and New Technologies Amanda du Preez,2009-10-02 In this era of ubiquitous information flow heightened mobility and limitless consumer convenience human interaction with new technologies has become increasingly seamless In the process the human body is effectively and steadily reduced to just another interface or a second life so to speak What is easily forgotten during this translucent transaction is that being human also necessarily implies being embodied In other words to constitute a body in its non negotiable physicality is still what it entails to be human amongst other things To live daily in and through the complicated and dynamic intersection between mind and body psychology and physiology also known as embodiment is what makes us human [Frankenstein's Daughters](#)

Jane L. Donawerth,1997-04-01 Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre an overwhelmingly male dominated field Science fiction has been defined by male centered scientific discourse that describes women as alien others rather than rational beings This perspective has defined the boundaries of science fiction resulting in women writers being excluded as equal participants in the genre Frankenstein s Daughters explores the different strategies women have used to negotiate the minefields of their chosen career they have created a unique utopian science formulated by and for women with women characters taking center stage and actively confronting oppressors This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley Marion Zimmer Bradley Ursula K Le Guin and Anne McCaffrey
