Lurias Legacy In The 21st Century:

Luria's Legacy in the 21st Century Anne-Lise Christensen,Elkhonon Goldberg,Dmitri Bougakov,2009 This is a collection of essays by leading neuropsychologists and cognitive neuroscientists to honor Alexander Romanovich Luria and to highlight the enduring impact of his legacy on cognitive neuroscience and clinical neuropsychology A wide range of topics is covered from functional neuroimaging in neuropsychology to bedside evaluation techniques Several generations of neuropsychologists and cognitive neuroscientists are their work by Luria s pioneering insight Rehabilitaci3n
neuropsicol3gica Olga Bruna,2011 Esta obra constituye un completo manual en el que se desarrollan los procesos de evaluaci3n rehabilitaci3n e intervenci3n neuropsicol3gica de personas afectadas por da3o cerebral causado tanto por procesos nuerodegenerativos como por traumatismos craneoencef3licos accidentes vasculares cerebrales etc Ofrece una visi3n completa de los programas de rehabilitaci3n existentes en la actualidad teniendo en cosideraci3n todas las patolog3as que pueden beneficiarse de este tratamiento as como de los datos procedentes de las investigaciones m3s recientes en el mbito de la neuropsicolog3a A.R. Luria and Contemporary Psychology Aleksandr Romanovich Lurii3a3,2005 This Luria Festschrift is dedicated to the life and legacy of A R Luria celebrating the centennial anniversary of his birth 1902 2002 The volume represents a group of authors most of whom either studied or collaborated with Alexander Romanovich The articles which were selected by Russians have also been written by Russians with the inclusion of international authors This volume is unique in that readers have the opportunity of discovering a Russian approach in understanding and implementing Luria s theories The contents of this book are divided into five sections The first section Cherishing the Memory of A R Luria presents a collection of personal experiences the authors had with Luria offering the reader a picture of the different sides of his personality The second section A R Luria and the Historical Cultural Approach in Psychology focuses on Luria s overall cultural historical approach also connected with remembrances of Alexander Romanovich The third section Luria s School of Neuropsychology presents a collection of articles by authors who use Luria s neuropsychology brain behavior relationships as well as directions developed after Luria s death such as ageing and dementia neuropsychology of psychiatry etc The fourth section Luria s Approach in Developmental Neuropsychology introduces the reader to the process of assessment and remediation with children in Russia The fifth section Lurian Neuropsychological Assessment and its Development focuses on the implementation of the Lurian approach to the practice of diagnostics in different social cultural conditions and on possibilities of quantitative evaluation of Lurian neuropsychological assessment data Kraks blaa bog ,2014 *Cultural Determinants of Category Learning* Xavier E. Cagigas,2008 A review of the cultural psychology literature reveals that some ethnic groups consistently perform differently on even the most basic cognitive tasks Specifically Asians attend to more contextual information whereas Caucasians selectively attend to the most salient stimulus dimension In order to determine if such processing differences in attention impact category learning this dissertation investigated whether Chinese Caucasians

and Latinos performed differently on the perceptual categorization task. Seventy-two Caucasian, 50 Chinese, and 47 Latino students matched in terms of years of education and gender represented a range of acculturation from foreign-born bilingual immigrants to native-born Americans whose only language is English. Participants learned to sort stimuli into one of two predetermined categories by receiving corrective feedback after each trial. In Experiment 1, participants learned a unidimensional rule requiring participants to attend selectively to a single stimulus dimension. In Experiment 2, participants learned a conjunctive rule requiring an explicit conjunction of two stimulus dimensions. In Experiment 3, participants learned an information integration rule requiring that participants integrate information from two stimulus dimensions at an implicit level. In addition to examining potential differences in accuracy using repeated measures analysis of variance, mathematical models identified the types of categorization strategies participants actually used when learning one of the three categorization rules. Finally, a regression analysis further investigated the possible underpinnings of observed ethnic group differences in categorization accuracy. No differences were observed between groups in Experiments 1 and 3, suggesting that category learning tasks that emphasize selective attention and implicit learning processes are not sensitive to the ethnic differences observed in previous studies. In Experiment 2, however, contrary to what would have been expected, Caucasians performed better than both Chinese and Latino participants when having to form an explicit sorting rule combining more than one stimulus dimension. Even after groups were equated based on the type of categorization strategies employed, these group differences persisted. Hierarchical regression further revealed that ethnicity did not predict accuracy after level of mainstream acculturation was taken into account. Secondary analysis of the acculturation subscales suggested that receptive language ability in English was the best predictor of overall accuracy in learning a conjunctive rule-based task over and above ethnic group membership. Overall, these results suggest that previously observed cultural differences are more likely related to factors other than ethnic group membership and therefore warrant further study.

Beasts and Birds of the Middle Ages Willene B. Clark, Meredith T. McMunn, 1989. The medieval bestiary or moralized book of beasts has enjoyed immense popularity over the centuries and it continues to influence both literature and art. This collection of essays aims to demonstrate the scope and variety of bestiary studies and the ways in which the medieval bestiary can be addressed. The contributors write about the tradition of one of the bestiary's birds, the Parisian production of the manuscripts, bestiary animals in a liturgical book, theological as well as secular interpretations of beasts, bestiary creatures in literature, and new perspectives on the bestiary in other genres.
