Elusive European Cheeses Noah Garcia, AI, 2025-01-29 *Elusive European Cheeses* embarks on a fascinating exploration of Europe's most secluded and rare cheese making traditions documenting over forty unique varieties that rarely venture beyond their local regions. This meticulously researched work combines scientific analysis with rich cultural storytelling revealing how geographical isolation has preserved ancient dairy making methods that often predate industrial production. The book progressively builds understanding by first establishing fundamental cheese science before delving into specific case studies across remote locations from Alpine valleys to Greek islands. Through extensive field research spanning five years, readers discover how indigenous bacterial cultures and specific environmental conditions create cheeses that simply cannot be replicated elsewhere. The author weaves together technical dairy production analysis with compelling firsthand accounts from multi-generational cheese making families offering readers both scientific insight and cultural context. What sets this work apart is its focus on truly rare varieties produced in such small quantities that they never reach international markets. By documenting these elusive cheeses and their traditional production methods, the book serves as both a practical guide and historical record of European dairy heritage. For food enthusiasts and professionals alike, it offers unique insights into cheese appreciation, optimal storage practices, and the delicate balance between preserving traditional methods while meeting modern food safety standards. *The Publishers Weekly* ,1915 *European Regional Policy and Development* María del Carmen Sánchez-Carreira, Paulo Jorge Reis Mourão, Bruno Blanco-Varela, 2023-07-18 The shortcomings of traditional regional policies led to a major policy. Thus, regions have become more active in the design and implementation of policies following a bottom-up approach and involving the participation of the local community in strategic planning as opposed to the traditional top-down method. This book addresses regional development theories and policies with a special focus on forgotten places and raises emerging questions about recent theoretical advances as well as trends and challenges in the field. It examines two main and related issues: the crucial role of regional actors for development and the role of Forgotten Spaces. It emphasizes the spatial territorial approaches from different theoretical perspectives underlining place-based approaches and compares the experiences of both successful and failed cases attempting to identify lessons and policy recommendations as well as adding empirical evidence to this field. The different cases presented which focus on Forgotten Spaces allow the reader to assess the role of different actors for regional development as well as some sectoral approaches. While there is a clear focus on European countries with different geographical, institutional, and sociocultural characteristics, the book also examines good and bad examples of regional development and policies related to forgotten places from different regions worldwide including developed and developing countries. The book benefits from contributions from over 20

authors from different nationalities and a rich diversity of case studies approaches and methods of discussion The authors discuss practical examples and more complex theoretical approaches involving techniques of spatial analysis spatial econometrics social networks content analysis as well as regional planning techniques The book will appeal to an interdisciplinary audience and will provide academicians politicians and policy designers with original and detailed analyses

Governance and City Regions Karsten Zimmermann, Patricia Feiertag, 2021-12-24 City regions are areas where the daily journeys for work shopping and leisure frequently cross administrative boundaries They are seen as engines of the national economy but are also facing congestion and disparities Thus all over the world governments attempt to increase problem solving capacities in city regions by institutional reform and a shift of functions This book analyses the recent reforms and changes in the governance of city regions in France Germany and Italy It covers themes such as the impact of austerity measures territorial development planning and state modernisation The authors provide a systematic cross country perspective on two levels between six city regions and between the national policy frameworks in these three countries They use a solid comparative framework which refers to the four dimensions functions institutions and governance ideas and space They describe the course of the reforms the motivations and the results and consequently they question the widespread metropolitan fever or resurgence of city regions and provide a better understanding of recent changes in city regional governance in Europe The primary readership will be researchers and master students in planning urban studies urban geography political science and governance studies especially those interested in metropolitan regions and or decentralisation Due to the uniqueness of the work the book will be of particular interest to scholars working on the comparative European dimension of territorial governance and planning The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Athenaeum, 1849 **Past and Present Migration Challenges** Francesca Fauri, Debora Mantovani, 2024-01-10 This edited collection sheds light on the complex nature of migratory movements through the lens of economic and social history It addresses a variety of migration issues involving Europe and the Americas in order to offer new insights on past and future migration and integration policies The volume comprises multi disciplinary research from both continents dealing with the economic political demographical and sociological impact of migration This interdisciplinary approach aims to stimulate intellectual dialogue on the migration phenomenon among the international community of scholars in Europe and North and South America It is divided into three parts which offer an essential contribution to the issue of migration and aim at better understanding the effect that different forms of migration have had and will continue to exert on economic and social change in receiving countries This book is a valuable resource for a wide audience including academics students in the economic and social sciences and government and EU officials working with migration topics

Theory in the "Post" Era Christian Moraru, Andrei Terian, Alexandru Matei, 2021-08-26 Shortlisted for the AATSEEL

2022 Award for Best Edited Multi Author Scholarly Volume AATSEEL is The American Association of Teachers of Slavic and East European Languages Theory in the Post Era brings together the work and perspectives of a group of Romanian theorists who discuss the morphings of contemporary theory in what the editors call the post era Since the Cold War s end and especially in the third millennium theorists have been exploring the aftermath and sometimes just the after of whole paradigms the crisis or passing of anthropocentrism the twilight of an entire ontological and cultural condition as well as the corresponding rise of an antagonist model of an anti meta or neo alternative with examples ranging from posthumanism and post postmodernism to post aesthetics postanalog interpretation or digicriticism post presentism post memory post or neo critique and so forth It is no coincidence the contributors to this volume argue that this post moment is also a time when theory is practiced as a world genre If theory has always been a worlded enterprise a quintessentially communal cross cultural and international project this is truer at present than ever Perhaps more than other humanist constituencies today s theorists work and belong in a theory commons that is transnational if still uneven economically politically and otherwise Theory in the Post Era reports the results of Romanian theory experiments that join efforts made in other places to foster a theory for the post age

Arrival City Doug Saunders, 2011-10-04 From one of Canada s leading journalists comes a major book about how the movement of populations from rural to urban areas on the margins is reshaping our world These transitional spaces are where the next great economic and cultural boom will be born or where the great explosion of violence will occur The difference depends on our ability to notice The twenty first century is going to be remembered for the great and final shift of human populations out of rural agricultural life into cities The movement engages an unprecedented number of people perhaps a third of the world s population and will affect almost everyone in tangible ways The last human movement of this size and scope and the changes it will bring to family life from large agrarian families to small urban ones will put an end to the major theme of human history continuous population growth Arrival City offers a detailed tour of the key places of the final migration and explores the possibilities and pitfalls inherent in the developing new world order From villages in China India Bangladesh and Poland to the international cities of the world Doug Saunders portrays a diverse group of people as they struggle to make the transition and in telling the story of their journeys and the history of their often multi generational families enmeshed in the struggle of transition gives an often surprising sense of what factors aid in the creation of a stable productive community

Tourism, Poverty and Development Andrew Holden, 2013-07-18 Poverty alleviation is high on the global policy agenda its importance being emphasised by its place as the first of the United Nation s Millennium Development Goals As a potentially significant source of economic growth in developing countries tourism may also play a major role in poverty reduction and alleviation under the right

circumstances The incorporation of tourism into development policy and Poverty Reduction Strategies has special poignancy for those Least Developed Countries where natural resources exist to support a tourism industry and there are limited development alternatives This book offers a holistic explicit and detailed introduction to the relationship of poverty and tourism within the context of developing countries The book is divided into distinct sections progressing from an evaluation of the key concepts of poverty tourism and development to the causal factors of poverty to the mechanisms of how tourism is being implemented in policy and practice to reduce poverty and finally to an analysis of the relationship between tourism to poverty alleviation in the future The adopted analytical approach of the key themes is multi disciplinary incorporating tourism studies human geography political economy economics development and environmental studies It integrates examples and original case studies from varying geographical developing regions including Africa South Asian and East Asia and the Pacific to lend practical insights into tourism s role in poverty alleviation The text will be of particular interest to higher education students from tourism studies geography political economy environmental and development studies and sociology backgrounds It will also be of relevance to government and policy makers alongside those who have a more general interest in poverty alleviation *The Bookseller* ,1921 Official organ of the book trade of the United Kingdom
