Techniques in Thrombosis — a Manual J. Jespersen, R.M. Bertina, F. Haverkate, 2013-12-01 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures It was the result of a unique cooperation between experts brought together by the European Concerted Action on Thrombosis and Disabilities ECAT The Concerted Action was at that time under the auspices of the Commission of the European Union The second edition like the first edition deals with diagnostic tests within the field of thrombosis However the second edition has a broader scope because it is no longer limited by the frontiers of ECAT Experts all over the world in and outside ECAT have contributed to this edition The editors are very grateful for their contributions The need for a new edition is obvious Since 1992 new assays have been introduced for research diagnosis and therapy of thrombosis for other assays improvements have been suggested while a few others became redundant The editors waived the radioimmunoassays of thromboglobulin and platelet factor 4 due to the fact that the kits required for these assays are rarely or no longer available Also the PAI 1 activity assay was waived as it is liable to many inconsistencies and to large variations A list of names and addresses of manufacturers marketing the kits and reagents has been compiled together with a list of the recommended nomenclature of quantities in thrombosis and haemostasis in order to facilitate the use of the updated version These lists have been carefully compiled by Johannes J Sidelmann PhD Department of Clinical Biochemistry in Esbjerg Denmark

Laboratory Data and Patient Care P. Kerkhof, 2012-12-06 The best conferences are often those where the participants are from a mixture of different disciplines There is a cross fertilization of ideas and a wider perspective of common problems The 6th International Meeting on Clinical Laboratory Organization and Management held in Noordwijkerhout The Netherlands on 24th-28th June 1987 lived up to its promise of a stimulating program and differing views from a wide range of international participants The theme of the conference was Laboratory Data and Patient Care and this provided a forum for discussion of many aspects of laboratory input into the diagnosis and monitoring of disease The titles of the papers in this book of the proceedings will give some indication of the breadth of topics discussed ranging from problems of laboratory management and professional leadership to educating the clinician in the most cost effective testing strategies and computer aided diagnosis to the best presentation of data and graphical displays The backgrounds of the participants were equally wide ranging from medical statisticians and computer experts to practising clinicians and heads of clinical laboratories There was also a significant number of delegates from commercial companies who were able to inject a different perspective on many problems This blend of backgrounds and disciplines promoted much discussion and new avenues for research and development
