Ramachandran, 2023-03-22 This book is a compilation from various resources presented to guide readers and expose tools needed to lead and implement successful Internet of Everything (IoE) projects in organizations. While most people probably picture computers and cell phones when the subject of technology comes up, technology is not merely a product of the modern era. Just as the availability of digital technology shapes how we live today, the creation of stone tools changed how pre-modern humans lived and how well they ate. Why technology is important in our daily life. This is because life without technology is pointless in today's dynamic world. Technology, which brings together tools to promote development, use, and information exchange, has as its main objective of making tasks easier and the solving of many problems of mankind. We all know that Checksheets are a set of questions or list of statements that will help us keep track of all the actions that have to be performed in a work. The purpose of these checksheets is to reduce failures, increase consistency, and completeness in performing a specific task. No matter what size companies are, constantly looking to increase productivity, efficiency, and performance. Naturally, the implementation of new technology can accomplish that. However, while introducing new technologies are essential in running a successful company, how we choose to introduce those technologies can make or break their success.
