Sturgeons and Paddlefish of North America G.T.O LeBreton, F. William H. Beamish, Scott R. McKinley, 2006-01-20

Modern North American sturgeons and paddlefish are the result of 100 million years of evolution. Once an integral part of aboriginal culture, their numbers were decimated by overfishing and habitat destruction during the past two centuries. This book details the extensive science aimed at helping these remarkable species recover from the brink of extinction and describes the historical biological and ecological importance of North American sturgeon and paddlefish. The text is enhanced by photographs and detailed line drawings. This comprehensive volume will be an invaluable resource for researchers, educators, and consultants in academic and government settings who work to further scientific understanding of these fishes. No other single compilation has documented current information in such detail.

Application of Recirculating Aquaculture Systems in Japan Toshio Takeuchi, 2017-12-29. This is the first English book to address the current development of closed recirculating aquaculture systems (cRASs) in Japan and its implications for industry in the near future. It offers an introduction to the topic and discusses the industrial application of cRASs. Around Europe, cRASs using freshwater have been developed, but to date there is little information about cRASs using saltwater. As such, the book introduces the technical development of cRASs using saltwater in Japan and describes measures necessary for their industrialization. It also discusses in detail various species, e.g., flounder, pejerrey, kuruma shrimp, white shrimp, and abalone, which have been raised in cRASs. Furthermore, it presents wide topics concerning the technological development of aquariums, an area in which progressive Japanese techniques dominate. Lastly, the book also examines CERAS and poly culture in Japan. The book is a valuable resource for a wide readership, such as local government officers, energy industry staff, maintenance and system engineers, as well as those from the construction, agriculture, and fishery industries.

A Manual for Tilapia Business Management Ram C. Bhujel, 2014-06-18. Tilapias are an increasingly important farmed fish for human consumption.
