Texts in Context David Boucher, 2012-12-06 The methodology of the study of the history of political thought is an area of study which has occupied my interests for nearly a decade I was introduced to the subject in University College Swansea My teachers there provided me with an excellent grounding in political studies I am particularly indebted to Bruce Haddock Peter Nicholson and W H Greenleaf Professor Greenleaf was kind enough to supply me with a copy of his bibliography and copies of two of his unpublished papers I continued to pursue my interest in methodology at the London School of Economics and Political Science I am indebted to Ken Minogue and Robert Orr who taught me there My greatest debt is to Dr Joseph Femia of the University of Liverpool who devoted a great deal of time to considering the arguments presented here His criticisms and suggestions for improvement proved to be invaluable I would also like to thank Alan Ryan for his general comments and encouraging advice It would be remiss of me if I neglected to express my gratitude to Dewi Beynon who was my first teacher of politics The research for this project was carried out in the following places The British Library of Political Science London The Sidney Jones Library University of Liverpool The National Library of Scotland Edinburgh The Main Library University of Edinburgh The Arts and Social Science Library University College Cardiff and the Bodleian Library Oxford

formal and informal interactions this book demonstrates that the inherent multi functional and polysemous aspect of language can also be observed in the use of questions What emerges is a sense of the considerable variety of question forms and also an understanding of how questions are used to perform a wide range of social actions The importance of context is stressed throughout the book both in guiding the speakers choices of question types and in helping to create the particular stance that characterizes those interactions The data used in this book shows that speakers prefer questions that are not canonical When speakers do use canonical questions these are overwhelmingly accompanied by some mollifiers This phenomenon suggests that in Japanese communication the illocutionary force of canonical questions is too strong To soften the interaction speakers tend to use other types of interrogative forms such as statements with rising intonation or at least to leave questions grammatically unfinished The findings in this book contribute to the understanding of how Japanese speakers use questions in different communicative interactions and provide new evidence of the gap between prescriptive grammar and actual communication

Puntel, 2025-05-15 In this masterful work leading German philosopher Lorenz B Puntel answers the primordial question of philosophy Why is there Being at all and not absolutely nothing Considering the history of philosophy from Parmenides through to Heidegger and beyond Puntel charges philosophy with persistently failing to adequately confront the question of Being In response Puntel

sets out a systematic philosophy to rival Hegel's Science of Logic and Whitehead's Process and Reality. In two parts the book first surveys the history of Western philosophy through the theoretical framework of Structural Systematic Philosophy (SSP) which unites continental philosophy's comprehensiveness with the precision and linguistic rigor of the analytic tradition. Analysing all of the major stages in the forgetfulness of Being in Western philosophy, Puntel establishes a dialogue with a vast number of thinkers and movements in the history of philosophy including Plato, Aquinas, Duns Scotus, Francisco Suarez, Christian Wolff, Leibniz, Hegel, Nietzsche, Heidegger, Sartre, W. O. Quine, Peter van Inwagen, Kit Fine, Alexius Meinong, and Jean-Luc Marion. The second part develops the methodical question of a systematic theory of Being. Puntel sets out a universal metaphysics introducing concepts of world existence and types of beings. Moreover, he examines the plurality of possible worlds, the disclosure of Being, and modern philosophies of subjectivity since Kant, including the analytic philosophies of Robert Brandom and Ernst Tugendhat. The book culminates in a theory of Being and explains the relation of Being to the concept of God. Being and Nothing is the third in Puntel's trilogy comprising Structure and Being (2008) and Being and God (2011) and is a book that will appeal to all those with an interest in the history of philosophy, continental philosophy, theology, and analytic philosophy.
