Graph Design For The Eye And Mind:

Graph Design for the Eye and Mind Stephen M. Kosslyn, 2006-08-10 Graphs have become a fixture of everyday life used in scientific and business publications in magazines and newspapers on television on billboards and even on cereal boxes Nonetheless surprisingly few graphs communicate effectively and most graphs fail because they do not take into account the goals needs and abilities of the viewers In *Graph Design for Eye and Mind* Stephen Kosslyn addresses these problems by presenting eight psychological principles for constructing effective graphs Each principle is solidly rooted both in the scientific literature on how we perceive and comprehend graphs and in general facts about how our eyes and brains process visual information Kosslyn then uses these eight psychological principles as the basis for hundreds of specific recommendations that serve as a concrete step by step guide to deciding whether a graph is an appropriate display to use choosing the correct type of graph for a specific type of data and message and then constructing graphs that will be understood at a glance Kosslyn also includes a complete review of the scientific literature on graph perception and comprehension and appendices that provide a quick tutorial on basic statistics and a checklist for evaluating computer graphics programs *Graph Design for Eye and Mind* is an invaluable reference for anyone who uses visual displays to convey information in the sciences humanities and businesses such as finance marketing and advertising

Graph Design for the Eye and Mind Stephen Michael Kosslyn, 2014-05-14 This book addresses the problems that arise when we attempt to convey information with visual displays such as graphs by presenting eight psychological principles for constructing effective graphs These principles are solidly rooted in the scientific literature on how we perceive and comprehend graphs and also in general facts about how our eyes and brains process visual information

Clear and to the Point Stephen M. Kosslyn, 2007-08-13 Making PowerPoint presentations that are clear memorable and even enjoyable is not an obscure art There is a science to clarity In this book Stephen Kosslyn a renowned neuroscientist presents eight simple principles for constructing a presentation that takes advantage of the information modern science has provided about how perception memory and cognition operate Using hundreds of images and sample slides he shows the common mistakes many people make and the simple ways to fix them For example never use underlining to emphasize a word the line will cut off the bottom of letters that have descending lines such as p and g which interferes with the brain's ability to immediately recognize text Other tips include why you should state your conclusion at the beginning of a presentation when to use a line graph versus a bar graph and how to use color correctly By following Kosslyn's principles anyone will be able to produce a clear and effective presentation *Making Sense of Data III* Glenn J. Myatt, Wayne P. Johnson, 2011-09-09 Focuses on insights approaches and techniques that are essential to designing interactive graphics and visualizations Making Sense of Data III A Practical Guide to Designing Interactive Data Visualizations explores a diverse range of disciplines to explain how meaning from graphical representations is extracted Additionally the book describes the best approach for designing and implementing interactive graphics and visualizations that play a central role in data exploration and decision support systems Beginning with an introduction to visual perception Making Sense of Data III features a brief history on the use of visualization in data exploration and an outline of the design process Subsequent chapters explore the following key areas Cognitive and Visual Systems describes how various drawings maps and diagrams known as external representations are understood and used to extend the mind's capabilities Graphics Representations introduces semiotic theory and discusses the seminal work of cartographer Jacques Bertin and the grammar of graphics as developed by Leland Wilkinson Designing Visual Interactions discusses the four stages of design process analysis design prototyping and evaluation and covers the important principles and strategies for designing visual interfaces information visualizations and data graphics Hands on Creative Interactive Visualizations with Protovis provides an in depth explanation of the capabilities of the Protovis toolkit and leads readers through the creation of a series of visualizations and graphics The final chapter includes step by step examples that illustrate the implementation of the discussed methods and a series of exercises are provided to assist in learning the Protovis language A related website features the source code for the presented software as well as examples and solutions for select exercises Featuring research in psychology vision science
