Newton, Elena

Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to

illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy

The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07

practical skills *Beyond the Instrumentalised Economy* Garrett Thomson, 2025-01-27 The concept of an economy requires us to characterise what human life and society are fundamentally about or what is valuable and why This includes our social relations with each other and to the ecosystems we live in as well as our happiness well being and flourishing Beyond the Instrumentalised Economy defines what work consumption and the use of natural resources would look like if they were not instrumentalised This enables the reader to see how a company would work in a non instrumentalised economy and what would constitute a non instrumentalised market Based on this the book provides insight concerning how investment would work in such an economy and the main features of a non instrumentalised financial system *Money and Sustainability* Christian Arnsperger Bernard Lietaer, Sally Goerner Stefan Brunnhuber, 2012-05-30 In 1972 the first Report for the Club of Rome The Limits to Growth famously spelled out the unsustainable consequences of an economic system that demands infinite growth in a finite world Just as The Limits to Growth exposed the catastrophic flaws in our economic system this new Report from the Club of Rome exposes the systemic flaws in our money system and the wrong thinking that underpins it It describes the ongoing currency and banking crises we must expect if we continue with the current monopoly system and the vicious impact of these crises on our communities our society as a whole and our environment Our money system is outdated brittle and unfit for purpose It is responsible for the endless cycle of boom and bust it systematically widens the gap between rich and poor it creates unemployment and multiplies other extremely adverse social effects of any financial economic crisis it undermines sustainability initiatives it disables vitally needed national and international action to limit multiple threats to the environment and the biosphere It is the single structural cause common to all financial and monetary instability Money and Sustainability The Missing Link Report from the Club of Rome proposes an alternative a monetary ecosystem with complementary currencies working alongside the conventional one This is more flexible resilient fair and sustainable Societies worked like this in the past So can we The book first explains these systemic problems in detail It s written in a way that s clearly accessible to the general public although it references at length a wide range of technical topics economics theory the history and institutions of banking the physics of complex flow networks the science of sustainability and population trends and climate change This gives a framework for understanding the present money system The authors then describe their proposal for an alternative money ecosystem which systematically addresses and resolves the problems created by the present system Finally this practical proposal is illustrated by nine case studies of different complementary currencies which are either running now in development or could be implemented at short notice in individual cities and regions around the world **Green Atlas** Dustin Mulvaney, 2013-07-03 This reference resource in atlas format is an online only compendium of maps and data sets accompanied by multimedia elements designed to illustrate key concepts in green issues and environmentalism graphically and interactively Topics for the maps presented in this work were selected from articles in the 12 volume SAGE Reference Series on Green Society Toward a Sustainable Future Each map includes links to

Money and Sustainability Bernard Lietaer,2012-05-30 A report from the Club of Rome EU Chapter to Finance Watch and the World Business Academy Foreword by Dennis Meadows co author of the 1972 Club of Rome report *The Limits to Growth*

The Bioregional Economy Molly Scott Cato,2013 In a world of climate change and declining oil supplies what is the plan for the provisioning of resources Green economists suggest a need to replace the globalised economy and its extended supply chains with a more local economy But what does this mean in more concrete terms How large is a local economy how self reliant can it be and what resources will still need to be imported The concept of the bioregion developed and popularised within the disciplines of earth sciences biosciences and planning may facilitate the reconceptualisation of the global economy as a system of largely self sufficient local economies A bioregional approach to economics assumes a different system of values to that which dominates neoclassical economics The global economy is driven by growth and the consumption ethic that matches this is one of expansion in range and quantity Goods are defined as scarce and access to them is a process based on competition The bioregional approach challenges every aspect of that value system It seeks a new ethic of consumption that prioritises locality accountability and conviviality in the place of expansion and profit it proposes a shift in the focus of the economy away from profits and towards provisioning and it assumes a radical reorientation of work from employment towards livelihood This book by leading green economist Molly Scott Cato sets out a visionary and yet rigorous account of what a bioregional approach to the economy would mean and how to get there from here

[How Compassion can Transform our Politics, Economy, and Society](#) Matt Hawkins,Jennifer Nadel,2021-11-29 How Compassion can Transform our Politics Economy and Society draws together experts across disciplines ranging from psychology to climate science philosophy to economics history to business to explore the power of compassion to transform politics our society and our economy The book shows that compassion can be used as the basis of a new political economic and social philosophy as well as a practical tool to address climate breakdown inequality homelessness and more Crucially it also provides a detailed plan for its execution It marks the first time that the study of compassion has been applied across multiple disciplines The book provides a template for the study of compassion on an interdisciplinary basis and will appeal to academics professionals and the general reader searching for a fresh and inspiring approach to the seemingly intractable problems facing the world

Developing Leadership Christopher Mabey,Wolfgang Mayrhofer,2015-06-18 What kind of a leader do you want to become The role of business schools in developing future managers and leaders has long been scrutinised and critiqued This has been exacerbated by the recent financial crisis and many books have been written that condemn business schools for producing leaders who graduate without the ability to respond to the changing world around them innovate or act in a responsible way By way of remedy this provocative book takes the critique and debate further

proposing a number of ethical and spiritual resources including Heiggarian philosophy classical Greek philosophy and the Maori notion of wairua It explores existing teaching practices and suggests ways that business schools can Encourage a greater understanding of different world views Introduce different perspectives such as the arts philosophy and spirituality Encourage the practice of responsible and ethical leadership Nurture innovation and creativity Developing Leadership is accompanied by filmed seminars exploring the central debates and interviews with the expert team of contributors A rare thing this book gives more than the label promises The title is about questions yet each chapter gives us answers to why important issues are not addressed in business schools and what to do about it This is a manifesto for reform and the next big question is what will you reader do about it Professor Jonathan Gosling Director Centre for Leadership Studies University of Exeter UK and Distinguished Visiting Professor of Leadership Development INSEAD France

Inclusive Educational Practices and Technologies for Promoting Sustainability Behera, Santosh Kumar,Ibrahim, Atyaf Hasan,Romdhani, Faten,2024-06-17 In today s rapidly evolving world the digital learning gap presents a significant challenge impacting the effectiveness of education and the development of essential skills for future generations Traditional teaching methods often fail to meet students diverse needs leading to a skills gap between current and future workers Additionally the ambiguity in defining concepts such as the heap paradox and the inadequacies of traditional economic measures like GDP highlights the need for more nuanced and comprehensive approaches to education environmental psychology and sustainable development Inclusive Educational Practices and Technologies for Promoting Sustainability offers a multifaceted solution to these pressing issues by exploring the transformative potential of Educational Technology EdTech the insights of environmental psychology and the importance of holistic measures of human welfare By showcasing how EdTech can bridge the digital learning gap enabling teachers to employ diverse strategies and better meet students needs we demonstrate its potential to revolutionize education and support the growth of the next generation The book also delves into the paradox of the heap where logic vagueness and philosophy complicate our methods of thinking It illustrates the complexities of everyday concepts and their relevance to environmental psychology while advocating for a deeper understanding of the human nature relationship
