[Green Tree Python Training Guide](#) Nathan Kyle, 2020-08-17 The green tree python *Morelia viridis* is one of the most interesting and vivid snakes appreciated by herpetoculturists Frequently alluded to by specialists and raisers as the chondro in view of the snake's unique family of Chondropython this little to medium sized arboreal species is indigenous to New Guinea and a portion of the encompassing islands just as the Cape York Peninsula of northern Australia This slim snake regularly seems littler than it really is because of its propensity for roosting on a branch in a smaller internal circled act Grown ups normal 4 to 5 feet long yet can surpass 6 feet Exceptionally nighttime green tree pythons only occasionally move during light hours and joined with its excellent hues this makes this python a less compromising snake to experience for individuals who are not used to hostage snakes

Caring for Green Tree Python Orion Ashford, 2025-04-04 Why Green Tree Pythons Are Fascinating There's something almost mythical about the Green Tree Python With its striking emerald green scales coiled gracefully around a branch like a living jewel it looks like a creature straight out of a fantasy novel But this snake is very real and it has captivated reptile lovers scientists and adventurers for generations What makes the Green Tree Python so special For one it has a way of blending elegance with mystery Unlike many other pythons that slither along the ground this one prefers the heights of the rainforest canopy living most of its life curled around tree branches It doesn't just sit there though it's an ambush predator patiently waiting for the perfect moment to strike at unsuspecting prey Another reason for its charm is its dramatic transformation Baby Green Tree Pythons don't start off green at all They hatch as bright yellow or deep red a striking contrast to their adult form Then like a slow motion magic trick they change color over several months shifting into that signature vibrant green No two look exactly alike making

each one a unique masterpiece of nature And let s talk about their personality yes snakes have personalities Some Green Tree Pythons are calm and composed while others can be a bit feisty quick to let you know when they want to be left alone They aren t aggressive just independent and confident much like a cat that decides when it wants attention Whether you re admiring one in the wild seeing it in a zoo or caring for one as a pet there s no denying that the Green Tree Python has an irresistible allure It s a creature that reminds us of nature s ability to create both beauty and mystery something wild untamed and absolutely mesmerizing
