***Renewable Energy: A Very Short Introduction*** Nick Jelley, 2020-02-27 Energy is vital for a good standard of living, and much of the world's population does not have enough. Affordable and adequate sources of power that do not cause climate change or pollution are crucial, and renewables provide the answer. Wind and solar farms can now provide the cheapest electricity in many parts of the world. Moreover, they could provide all of the world's energy needs. But while market forces are fast helping the transition from fossil fuels to renewables, there are opposing pressures, such as the USA's proposed withdrawal from the Paris Agreement and the vested interests in fossil fuels. This Very Short Introduction describes the main renewable sources of energy: solar, wind, hydropower, and biomass, as well as the less well-developed ones: geothermal, tidal, and wave. Nick Jelley explains the challenges of integrating renewables into electricity grids and the need for energy storage and for clean heat, and discusses the opportunities in developing countries for renewable energy to empower millions. He also considers international efforts and policies to support renewables and tackle climate change, and explains recent innovations in wind and solar energy, production, battery storage, and in the emerging power-to-gas provision for clean heating. Throughout, he emphasises what renewable energy can deliver and its importance in tackling climate change and in improving health, welfare, and access to electricity.

***Introduction to Comoros*** Gilad James, PhD, The Comoros Islands are located in the Indian Ocean between Madagascar and the African continent. Comoros is a small island nation composed of four islands: Grande Comore, Moheli, Anjouan, and Mayotte. The islands are known for their rich culture and diverse history, influenced by Arab traders, African settlers, and European colonizers. The primary language spoken in Comoros is Comorian, which is a blend of Swahili, Arabic, and French. Islam is the official religion, and the islands are known for their unique brand of Sufi Islam. The Comoros economy is primarily based on agriculture, with cloves being the most important and lucrative crop. While the nation faces numerous challenges, such as political instability and economic inequality, it remains a fascinating and culturally rich destination for visitors.
