Lubricating The Field Stripped Firearm

To properly lubricate your GLOCK pistol after it has been thoroughly cleaned and dried, use a clean patch that has been slightly dampened with quality gun oil. Wipe the barrel; the barrel hood; the inside of the slide where the barrel hood rubs against the slide; and the ring that the barrel slides through the slide. You can take one drop of oil on your finger and rub each slide rail, or put one drop of oil in each slide rail cut. Once the slide is moved on the receiver after reassembly, the oil drop will be distributed equally in the slide rails by moving the slide. Most important is the drop of oil (Figure 20) where connector & trigger bar meet.

This will assure proper lubrication of your GLOCK pistol without over-lubricating. GLOCK pistols are designed to operate properly with only small amounts of lubrication.

Do not over-lubricate your GLOCK pistol, as large quantities of oil or grease will collect unburnt powder and other residue, which could interfere with proper functioning of your GLOCK pistol.

Dry Firing

Figure 20

slide is removed from frame, as damage to the firing pin and firing pin safety could result.

WARNING:

Do not put oil inside firing pin

tube and breech face should be wiped dry before reassembly. Leaving solvent or lubricant in these areas could cause contamination of primers and failure to fire.
