When the truck is used to carry a load in excess of the rated capacity of the truck, neither of the owner's or carrier's ratings apply. The weight of loaded additional cargo equipment included in the manufacturer's rated weight figure, the weight of excess cargo and the weight of passengers in the cargo. The total required weight on axles for the truck's rated weight rating (GAWR) and the carrier's rating of capacity should fall within the truck's recommended range. None of these may also be added.

Any moisture or other impurities added to the vehicle after final date of manufacture, must be weighed and the weight deducted from the grossed cargo weight rating (GCWR) of the vehicle. This may decrease the permissible loading and use of the vehicle or classify it for the vehicle.

The longitudinal stress of gravity may be determined for the full cargo weight rating (GWR) of the truck. If a driver carries his load weight less than the cargo weight rating (GWR), the percentage longitudinal stress of the cargo of gravity may be larger. However, tak-

Always leave time to prevent weight shifts that could affect the balance of your vehicle. When the truck engine is loaded, drive to a scale and weigh on the front end and on the rear wheels separately to determine axle loads. Individual axle loads should not exceed either of the gross axle weight ratings (GAWR). The total of the axle loads should not exceed the gross vehicle weight rating (GVWR). These ratings are given on the vehicle certification label that is located either on the left door hinge post or on the left door edge next to the driver. If weight ratings are exceeded, move or remove items to bring all weights below the ratings.

Crane weight rating (CWR) means the value specified by the vehicle manufacturer as the cargo carrying capacity in pounds of a vehicle, exclusive of the weight of occupants, compared to 10 pounds more the number of designated seating positions.

Your vehicle dealer will assist you in obtaining a proper truck coverage match and pointing out the vehicle load capacities are not extended.

Keywords: The usage context of goods is only one of many factors which may affect the overall performance of a vehicle. Including handling, steering and braking, the recommended limits for the company's usage of goods are based on the assumption that the vehicle will be operated with reasonable systems in light of all of the existing conditions. Failure to do so could result in diminished vehicle performance and thereby vehicle lifespan.
