**Reasons?** Valentin Teodorescu, 2023-11-06 This study intends to show that the answer to the question whether faith can be

justified without proofs can be resolved by importing ideas from Søren Kierkegaard's and Alvin Plantinga's affirmative take on the matter. There is a deep similarity between the way they understand belief in God and belief in Christianity. The authors share the modern idea that there is an objective truth combining it with the postmodern stance that no method exists which would guarantee access to it. One can see at both authors not only a deep commonality of ideas but also a remarkable way in which their understandings augment each other. Whereas Kierkegaard comes to the provocative conclusion that if a person wants to live authentically she will meet Christ on her life's journey without needing any proof, Plantinga's inquiry contributes to the rational plausibility of this. **Justified Faith without Reasons project**     On the Origin of Consciousness Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self-consciousness self-awareness originated in the universe? Understanding consciousness is one of the toughest nuts to crack. In recent years, scientists and philosophers have attempted to provide an answer to this mystery. The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world. Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews. Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything. Without it, reasoning would be impossible. Dr. Scott Ventureyra in this ground-breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question. He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe. He also makes a modest claim that the Christian conception of God and Creation provides a plausible account for the origin of self-consciousness. He integrates philosophy, theology, and science in an innovative way to embark on this exploration.

**Facing Suffering** Roberto Badenas, 2021-05-17 In a myriad of forms, acute, violent, dull, excruciating, persistent pain wears down the body and oppresses the spirit. It abounds in the life of the poor and ruins the life of the rich. It makes a child cry, disfigures a young person's body, marks an adult's face, and bows the shoulders of the elderly. From the cradle to the grave, our suffering is relentless. Work and pleasure, dependence and freedom, virtue and vice, love and hate, all can make us suffer. Pain is part of our human condition. You could say that we are no longer children when we learn that a mother's kiss cannot take away all of our sorrows. This book is intended to help the individual face suffering with dignity and realism, addressing some of the more practical aspects: psychological, social, philosophical, and theological. With an awareness of subject's complexity, the book presents a series of thoughts aimed at understanding the ultimate why behind pain and how to cope with it meaningfully. In addition, with the layman in mind, this book provides simple resources to face one's own pain calmly and that of others with compassion and tact. The objective is to help fight and endure the reality of pain as much as possible with courage and hope.     **The Mysterious Epigenome** Thomas Woodward, James P. Gills, 2011-12-01 In this creative and inventive treatment, authors Thomas E. Woodward and James P. Gills take readers on an exploration of the human epigenome. molecular makeup Readers as visitors will get up close and personal with the minute details of human molecular structure including E coli flagellum a DNA helix an RNA molecule and more By seeing it with their own eyes readers will gain a better understanding of their genetic systems and a better appreciation for the Creator who put this all into place **A New Dawn, or the Fading of the Light? Culture and Evangelization Today** John C. Gallagher C.S.B.,2019-12-05 Parents are disheartened when their children fall away from religious practice Pastoral workers wonder how they can get people to take religion seriously Something is at work that is puzzling but we can learn something useful about it A crucial factor is the role of culture To have faith is an act of individual responsibility but it can also be influenced by life around us For example popular opinion or concentration on making a fortune can make us deaf to any message about what lies beyond our immediate concerns This book is the fruit of the author s extensive study of how cultural forces influence attitudes Calling on long experience lecturing and in pastoral ministry he shows how cultural factors influence religious belief in our times and how ordinary believers can be active participants in creating a culture that opens us to God s word **Can Science Explain Everything?** John Lennox,2019-01-01 An inspiring new perspective on the science versus religion debate An inspiring new perspective on the science versus religion debate Can science explain everything Many people think so Science and the technologies it has spawned has delivered so much to the world clean water more food better healthcare longer life And we live in a time of rapid scientific progress that holds enormous promise for many of the problems we face as humankind So much so in fact that many see no need or use for religion and belief systems that offer us answers to the mysteries of our universe Science has explained it they assume Religion is redundant Oxford Maths Professor and Christian believer John Lennox offers a fresh way of thinking about science and Christianity that dispels the common misconceptions about both He reveals that not only are they not opposed but they can and must mix to give us a fuller understanding of the universe and the meaning of our existence Systematic Atheology John R. Dembski,Casey Luskin,Joseph M. Holden,2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the

**Finding True Happiness** Robert Spitzer,2015-03-30 One of the hottest topics in contemporary culture is happiness so much so that the United Nations declared an International Happiness Day in response to the immense popularity of Pharrell Williams song Happy The explanation for this current fixation seems to lie in the contrary phenomenon unhappiness Despite the fact that we have tremendous access to every imaginable form of entertainment we experience a pervading sense of insecurity emptiness and malaise amid sporadic peak experiences The problem seems to lie less in the external environment than in the internal one We seem in the words of Viktor Frankl to be suffering from an absence of meaning that pervades both individuals and societies giving rise to a collective emptiness loneliness and alienation Finding True Happiness attempts to provide a way out of this personal and cultural vacuum by helping people to identify and then reach for happiness As Aristotle noted 2 400 years ago happiness is the one thing we can choose for its own sake everything else is chosen for the sake of happiness After an exhaustive investigation of philosophical psychological and theological systems of happiness author Fr Spitzer developed the Four Levels of Happiness which he based on the classical thinkers Plato Aristotle Augustine and Aquinas the contemporary philosophers Marcel Scheler Buber Ricoeur and Jaspers and the modern psychologists Maslow Frankl Erikson Seligman Kohlberg and Gilligan Finding True Happiness is both a philosophical itinerary and a practical guidebook for life s most important journey from the mundane and the meaningless to transcendent fulfillment No other book currently available combines such breadth of practical advice and such depth of philosophical psychological and spiritual wisdom

**The Scientism Delusion** Gregory Lessing

Garrett,2018-03-20 This enthralling page turner breaks all the molds and fearlessly exposes the deepest darkest intrigue in history The Luciferian Agenda for a New World Order In it we learn of the Luciferian roots of Modern Science as the reader is transported back in time to the insidious origins of modern day Scientism the current religion of most scientists today Through an excursion into the roots of Scientism Mr Garrett deftly retraces the historical antecedents of Scientism echoing back to The Secret Mystery Schools of Kabbalistic Egyptian Hermeticism onwards into the true nature of Freemason and Alchemical Occultist Sir Isaac Newton and then further into the nefarious Vatican Jesuit Priesthood whose hidden hand can be linked to the creation of The Illuminati as well as the current Luciferian New Age Religion Finally the serpentine path leads up into modern Freemasonic Luciferian NASA and then to The Jesuit Controlled Alien Deception about to take hold of the world Christian Chesterfield Ph D      **The Anthropic Principle: A Universe Built for Man** Anthony Walsh,2023-01-10 The Copernican Principle states that humankind is an insignificant assemblage of chemical scum living on an accidental planet in a suburb of a purposeless universe Many prominent scientists including Nobel laureate physicists have questioned this scurrilous principle which has led physicists to propose the Anthropic Principle This principle posits a purposeful link between the structure of the universe and the existence of humankind and its specialness The numerous features of the universe are so freakishly fine tuned for the existence of intelligent life that physicists are beginning to come to grips with the notion that our universe is profoundly purposeful and that there is a powerful and incredibly intelligent Mind behind it all

*Echoes of Coinherence* W. Ross Hastings,2017-07-28 This book re imagines the universe and the scientific study of it through the lens of a triune Creator three persons of irreducible identity in a perichoretic or coinherent communion It modestly proposes that Trinitarian theology and especially the coinherent natures of the Son in the incarnation provides the metaphysic or theory of everything that manifests itself in the subject matter of science The presence of the image of the triune God in humanity and of traces of this God in the non human creation are discussed highlighting ontological resonances between God and creation resonances between the being of God and his creation such as goodness immensity yet particularity intelligibility agency relationality and beauty This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science critical realism something reflected in the history of ideas in each These resonances lead to the conclusion that the disciplines of theology and science are in fact coinherent not conflicted This involves recognition of both the mutuality of these vocations and also importantly their particularity Science its own distinct guild yet finds its place ensconced within an encyclopedic theology and subject to first order credal theology

**Unbelievable** Michael Newton Keas,2019-01-08 Unbelievable explodes seven of the most popular and pernicious myths about science and religion Michael Newton Keas a historian of science lays out the facts to show how far the conventional wisdom departs from reality He also shows how these myths have proliferated over the past four centuries and exert so much influence today infiltrating science textbooks and popular culture The seven myths Keas shows amount to little more than

religion bashing especially Christianity bashing Unbelievable reveals Why the Dark Ages never happened Why we didn't need Christopher Columbus to prove the earth was round Why Copernicus would be shocked to learn that he supposedly demoted humans from the center of the universe What everyone gets wrong about Galileo's clash with the Church and why it matters today Why the vastness of the universe does not deal a blow to religious belief in human significance How the popular account of Giordano Bruno as a martyr for science ignores the fact that he was executed for theological reasons not scientific ones How a new myth is being positioned to replace religion a futuristic myth that sounds scientific but isn't In debunking these myths Keas shows that the real history is much more interesting than the common narrative of religion at war with science This accessible and entertaining book offers an invaluable resource to students scholars teachers homeschoolers and religious believers tired of being portrayed as anti intellectual and anti science

Evolutionary History in Theological Perspective Mario Anthony Russo, 2024-06-10 Evolutionary History in Theological Perspective Exploring the Scientific Story of the Cosmos develops a new theological interpretation of evolutionary history Exploring both secular and theological interpretations of evolutionary history this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history This new lens is then applied to relevant questions raised by the evolutionary process especially suffering and helps overcome the current shortcomings of contemporary interpretations of evolutionary history
