

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light, labeled 'Incoming solar radiation'. These rays strike the Earth, which is shown as a blue and green sphere at the bottom. On the left side of the Earth, some rays are reflected away from the surface and atmosphere, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. On the right side, most of the rays are absorbed by the Earth's surface, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. From the Earth's surface, rays point upwards towards the atmosphere, labeled 'Some heat passes out into Space'. Finally, on the far right, rays point downwards from the atmosphere back towards the Earth's surface, labeled 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth'.
