Forthcoming Books Rose Arny, 2002 **Books in Print**, 1991 **Performing Illusions** Dan R. North, 2008 The camera supposedly never lies yet film's ability to frame cut and reconstruct all that passed before its lens made cinema the pre eminent medium of visual illusion and revelation from the early twentieth century onwards This volume examines film's creative history of special effects and trickery encompassing everything from George M. Li's first trick films to the modern CGI era Evaluating movements towards the use of computer generated synthespians in films such as Final Fantasy the Spirits Within 2001 this title suggests that cinematic effects should be understood not as attempts to perfectly mimic real life but as constructions of substitute realities situating them in the cultural lineage of the stage performers and illusionists and of the nineteenth century With analyses of films such as Destination Moon 1950 Spider Man 2002 and the King Kong films 1933 and 2006 this new volume provides an insight into cinema's capacity to perform illusions

Framed Time Garrett Stewart, 2008-09-15 Italian director Michelangelo Antonioni claimed three decades ago that different conceptions of time helped define the split in film between European humanism and American science fiction And as Garrett Stewart argues here this transatlantic division has persisted since cinema's 1995 centenary made more complex by the digital technology that has detached movies from their dependence on the sequential frames of the celluloid strip Brilliantly interpreting dozens of recent films from Being John Malkovich Donnie Darko and The Sixth Sense to La mala educaci n and Cach Stewart investigates how their treatments of time reflect the change in media from film's original rolling reel to today's digital pixel He goes on to show with 140 stills how American and European narratives confront this shift differently while Hollywood movies tend to revolve around ghostly afterlives psychotic doubles or violent time travel their European counterparts more often feature second sight erotic telepathy or spectral memory Stewart questions why these recent plots in exploring temporality gravitate toward either supernatural or uncanny apparitions rather than themes of digital simulation In doing so he provocatively continues the project he began with Between Film and Screen breaking new ground in visual studies cinema
