

Unit 13 Magnetism

Exercise 13.1 Magnets and magnetic materials

- 1 a He should bring the magnet and material close together and assess whether or not they attract.

b

Item	Attracted (✓) or not attracted (✗)
copper coin	✗
steel paper clip	✓
aluminium foil tray	✗
plastic cup	✗
wooden stick	✗
iron nail	✓
water in a cup	✗

- c Any other magnetic item e.g. a steel needle.
 d Any other non-magnetic item e.g. a piece of string.
- 2 The door has a magnet on it. This is attracted to the steel door. The magnetic force between them keeps the door shut.

Exercise 13.2 Magnetic forces, making magnets

- 1 a Nikita is wrong; one object might be a permanent magnet and the other a piece of magnetic material.
 b The objects must both be permanent magnets. They repel because like poles have been brought together.
 c Bring a piece of unmagnetised steel close to **X** and then to **Y**. If it is not attracted by either, then neither **X** nor **Y** is a permanent magnet. (Alternatively, use a permanent magnet; no attraction **or** repulsion shows that neither **X** nor **Y** is a permanent magnet.)
- 2 a Unmagnetised on the left, magnetised on the right.
 b Each half has its domains lined up so each will be a small magnet, with N at one end and S at the other.

Exercise 13.3 Representing magnetic fields

- 1 a S at left-hand end, N at right.
 b Field lines come out of N pole.
 c Compass needles follow field lines, from N to S.
 d Field lines are closest together near the poles, so field is strongest there.
 e Students should shade field darkest near poles, fainter farther away.
 f Shading cannot show the direction of the field, only the relative strength.
- 2 a Both have N pole on left, S pole on right.
 b Attracting; unlike poles are close together.
 c Force arrows to right on A and to left on B.
 d Needle of compass between poles points directly from right to right.

Exercises in Electricity and Magnetism Teruo Matsushita, 2025-06-11 This book covers a great variety of problems on electricity and magnetism described in the textbook Electricity and Magnetism in which superconductors are classified as one kind of magnetic materials These problems will be helpful for a deeper understanding of the E B analogy through a comparison between static electric and magnetic phenomena Additionally the usefulness of the vector potential is widely introduced For example the vector potential is directly used to determine the induced electromotive force The author provides various exercises that are not covered in the textbook The Poynting vector is useful for understanding the energy flow into capacitors or transmission lines during a charging process or into resistors during a dissipation process A comparison between normal conducting and superconducting transmission lines shows a clear difference in the energy flow although the final stored magnetic energy is the same The electromagnetic potential of electromagnetic transverse electric TE and transverse magnetic TM waves in a waveguide also presents an interesting difference The electric potential is zero in one case and non zero in the other case The reason for such a difference is explored The relationship between the electric charge and electric current induced on the conductor surface is investigated for an electromagnetic wave in a waveguide or for that reflected on a conductor surface This exercise book can be used together with the textbook Electricity and Magnetism by the same author

Magnetism and Electromagnetic Induction for JEE Advanced, 3E (Free Sample) B. M. Sharma, 2022-05-19 Magnetism and Electromagnetic Induction for JEE Advanced a Cengage Exam Crack Series product is designed to help aspiring engineers focus on the subject of physics from two standpoints To develop their caliber aptitude and attitude for the engineering field and profession To strengthen their grasp and understanding of the concepts of the subjects of study and their applicability at the grassroots level Each book in this series approaches the subject in a very conceptual and coherent manner While its illustrative solved examples facilitate easy mastering of the concepts and their applications an array of solved problems exposes the students to a variety of questions that they can expect in the examination The coverage and features of this series of books make it highly useful for all those preparing for JEE Main and Advanced and aspiring to become engineers

Physics—Problems, Solutions, and Computer Calculations Wan Muhamad Saridan Wan Hassan, Abd Rahman Tamuri, Muhammad Zaki Yaacob, Roslinda Zainal, 2023-12-05 Knowledge of and skill in physics are essential foundations for studies in science and engineering This book offers students an introduction to the basic concepts and principles of physics It covers various topics specifically related to waves sound electricity magnetism and optics Each chapter begins with a summary of concepts principles definitions and formulae to be discussed as well as ending with problems and solutions that illustrate the specific topic Steps are detailed to help build reasoning and understanding There are 250 worked problems and 100 exercises in the book as well as 280 figures to help the reader visualize the processes being addressed Computer calculations and solutions are carried out using wxMaxima to give insight and help

build computational skills The book is aimed at first year undergraduate students studying introductory physics and would also be useful for physics teachers in their instruction particularly the exercises at the end of each chapter Matter and Interactions Ruth W. Chabay, Bruce A. Sherwood, 2011 Matter and Interactions offers a modern curriculum for introductory physics calculus based It presents physics the way practicing physicists view their discipline and integrates 20th Century physics and computational physics The text emphasizes the small number of fundamental principles that underlie the behavior of matter and models that can explain and predict a wide variety of physical phenomena Matter and Interactions will be available as a single volume hardcover text and also two paperback volumes *Physics (Electricity, Magnetism, And EM Theory)* Dr. Mahender Prasad Aggarwal, Dr. Prem Singh, Dr. S.K.
