Magnificent Maps Power Propaganda And Art:

Magnificent Maps Peter Barber, Tom Harper, British Library, 2010 Published on the occasion of the exhibition at the British Library London April 30 Sept 19 2010 **Leading the Project Revolution** Darren Dalcher, 2019-02-25 People play a vital part in the success of projects initiatives and organisations yet traditional project management sources offer limited guidance and insights that extend beyond technical roles and prescriptions *Leading the Project Revolution* delves into the dynamics of people teams and organisations exploring their impact on leadership strategy success and achievement The book offers a progressive agenda for improving project practice enabling the dialogue to advance from the typical coverage of static toolsets towards an understanding of flexible mindsets Flexibility agility and resilience are addressed as the social cultural and complexity dimensions of leadership strategy organisations and project execution are examined and practical insights are synthesised into pragmatic models and frameworks The volume brings together some of the best writing by leading authorities on teams leadership corporate culture human behaviour organisational dynamics psychology complexity strategy execution innovation social media and decision sourcing **Romantic Cartographies** Sally Bushell, Julia S. Carlson, Damian Walford Davies, 2020-12-10 An innovative interdisciplinary study of cartography as a significant multifaceted cultural practice in Romantic period culture **Women and Geography on the Early Modern English Stage** Katja Pilhuj, 2025-10-01 In a late 1590s atlas proof from cartographer John Speed Queen Elizabeth appears crowned and brandishing a ruler as the map's scale of miles Not just a map key the queen's depiction here presents her as a powerful arbiter of measurement in her kingdom For Speed the queen was a formidable female presence authoritative ready to measure any place or person The atlas finished during James reign later omitted her picture But this disappearance did not mean Elizabeth vanished entirely her image and her connection to geography appear in multiple plays and maps Elizabeth becomes like the ruler she holds an instrument applied and adapted *Women and Geography on the Early Modern English Stage* explores the ways in which mapmakers playwrights and audiences in early modern England could following their queen's example use the ideas of geography or world writing to reshape the symbolic import of the female body and territory to create new identities The book demonstrates how early modern mapmakers and dramatists men and women conceived of and constructed identities within a discourse of fluid ideas about space and gender *Cartography* Matthew H. Edney, 2019-04-12 In his most ambitious work to date Edney questions the very concept of cartography to argue that this flawed ideal has hobbled the study of maps Susan Schulten author of *A History of America in 100 Maps* Over the past four decades the volumes published in the landmark *History of Cartography* series have both chronicled and encouraged scholarship about maps and mapping practices across time and space As the current director of the project that has produced these volumes Matthew H Edney has a unique vantage point for understanding what cartography has come to mean and include In this book Edney disavows the term cartography rejecting the notion that maps represent an

undifferentiated category of objects for study Rather than treating maps as a single unified group he argues scholars need to take a processual approach that examines specific types of maps sea charts versus thematic maps for example in the context of the unique circumstances of their production circulation and consumption To illuminate this bold argument Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray By exposing the flaws in this ideal his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic The study of cartography will never be the same An intellectually bracing and marvellously provocative account of how the mythical ideal of cartography developed over time and in the process distorted our understanding of maps Times Higher Education Cartography The Ideal and Its History offers both a sharp critique of current practice and a call to reorient the field of map studies A landmark contribution K ren Wigen coeditor of Time in Maps

Object-Oriented Cartography

Tania Rossetto,2019-05-16 Object Oriented Cartography provides an innovative perspective on the changing nature of maps and cartographic study Through a renewed theoretical reading of contemporary cartography this book acknowledges the shifted interest from cartographic representation to mapping practice and proposes an alternative consideration of the thingness of maps Rather than asking how maps map onto reality it explores the possibilities of a speculative realist map theory by bringing cartographic objects to the foreground Through a pragmatic perspective this book focuses on both digital and nondigital maps and establishes an unprecedented dialogue between the field of map studies and object oriented ontology This dialogue is carried out through a series of reflections and case studies involving aesthetics and technology ethnography and image theory and narrative and photography Proposing methods to further develop this kind of cartographic research this book will be invaluable reading for researchers and graduate students in the fields of Cartography and Geohumanities

Mapping and Politics in the Digital Age Pol Bargaés-Pedreny,David Chandler,Elena Simon,2018-11-06 Throughout history maps have been a powerful tool in the constitutive imaginary of governments seeking to define or contest the limits of their political reach Today new digital technologies have become central to mapping as a way of formulating alternative political visions Mapping can also help marginalised communities to construct speculative designs using participatory practices Mapping and Politics in the Digital Age explores how the development of new digital technologies and mapping practices are transforming global politics power and cooperation The book brings together authors from across political and social theory geography media studies and anthropology to explore mapping and politics across three sections Contestations introduces the reader to contemporary developments within mapping and explores the politics of mapping as a form of knowledge and contestation Governance analyses mapping as a set of institutional practices providing key methodological frames for understanding global governance in the realms of urban politics refugee control health crises and humanitarian interventions and new techniques of biometric regulation and autonomic computation Imaginaries provides examples of future oriented analytical frameworks highlighting the transformation of mapping in an age of digital

technologies of control and regulation In a world conceived as without borders and fixed relations new forms of mapping stress the need to rethink assumptions of power and knowledge This book provides a sophisticated and nuanced analysis of the role of mapping in contemporary global governance and will be of interest to students and researchers working within politics geography sociology media and digital culture and technology The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY ND 4.0 license

Visual Representations of the Arctic Markku Lehtimäki, Arja Rosenholm, Vlad Strukov, 2021-03-30 Privileging the visual as the main method of communication and meaning making this book responds critically to the worldwide discussion about the Arctic and the North addressing the interrelated issues of climate change ethics and geopolitics A multi disciplinary multi modal exploration of the Arctic it supplies an original conceptualization of the Arctic as a visual world encompassing an array of representations imaginings and constructions By examining a broad range of visual forms media and forms such as art film graphic novels maps media and photography the book advances current debates about visual culture The book enriches contemporary theories of the visual taking the Arctic as a spatial entity and also as a mode of exploring contemporary and historical visual practices including imaginary constructions of the North Original contributions include case studies from all the countries along the Arctic shore with Russian material occupying a large section due to the country's impact on the region

For Creative Geographies Harriet Hawkins, 2013-10-08 This book provides the first sustained critical exploration and celebration of the relationship between Geography and the contemporary Visual Arts With the growth of research in the Geohumanities and the Spatial Humanities there is an imperative to extend and deepen considerations of the form and import of geography art relations Such reflections are increasingly important as geography art intersections come to encompass not only relationships built through interpretation but also those built through shared practices wherein geographers work as and with artists curators and other creative practitioners For *Creative Geographies* features seven diverse case studies of artists works and exhibitions made towards the end of the twentieth and the beginning of the twentieth first century Organized into three analytic sections the volume explores the role of art in the making of geographical knowledge the growth of geographical perspectives as art world analytics and shared explorations of the territory of the body In doing so Hawkins proposes an analytic framework for exploring questions of the geographical work art does the value of geographical analytics in exploring the production and consumption of art and the different forms of encounter that artworks develop whether this be with their audiences or their makers

Body/State Jen Dickinson, 2016-04-08 *Body State* brings together original essays addressing various aspects of the evolving interaction between bodies and states While each essay has different empirical and or theoretical focus authors consider a number of overlapping themes to appreciate the state's engagement with and concern about bodies Divided into five parts the first part *Bodies Modified and Divided* considers how the production regulation policing and maintenance of borders physical social

sexual political religious etc are used to enable or constrain the physical re shaping of the body Part two Capital Bodies extends the state s concern with the flows of bodies that make up the nation to consider how they are enrolled in the complex structures of capitalist exchange that form the basis for maintaining and contesting a set of relationships between states and markets Part three Deviance and Resistance examines both how states seek to discipline non normal bodies and appreciates the capacity of changes in the socio cultural meaning and nature of bodies to resist and or escape states Part four Sovereignty and Surveillance develops themes of deviancy and resistance by considering the impact of new technologies both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself Finally Part five The Body Virtual examines the impact of new technologies and online spaces both on the intimate regulatory reach of states into and across bodies and on the nature of embodiment itself A varied collection of essays that address important and complex topics in a readable and creative way *The Chanson des Chétifs and Chanson de Jérusalem* Carol Sweetenham,2020-04-22 The First Crusade was arguably one of the most significant events of the Middle Ages It was the only event to generate its own epic cycle the Old French Crusade Cycle The central trilogy at the heart of the Cycle describes the Crusade from its beginnings to the climactic battle of Ascalon comprising the Chanson d Antioche the Chanson des Ch tifs and the Chanson de J rusalem This translation of the Ch tifs and the J rusalem accompanies and completes the translation of the Antioche and makes the trilogy available to English readers in its entirety for the first time The value of the trilogy lies above all in the insight it gives us to medieval perceptions of the Crusade The events are portrayed as part of a divine plan where even outcasts and captives can achieve salvation through Crusade This in turn underlies the value of the Cycle as a recruiting and propaganda tool The trilogy gives a window onto the chivalric preoccupations of thirteenth century France exploring concerns about status heroism and defeat It portrays the material realities of the era in vivid detail the minutiae of combat smoke filled halls feasts prisons and more And the two newly translated poems are highly entertaining as well featuring a lubricious Saracen lady not in the first flush of youth a dragon inhabited by a devil marauding monkeys miracles and much more The historian will find little new about the Crusade itself but abundant material on how it was perceived portrayed and performed The translation is accompanied by an introduction examining the origins of the two poems and their wider place in the cycle It is supported by extensive footnotes a comprehensive index of names and places and translations of the main variants Mapping Our World Peter Barber,Katherine Barnes,Dr Nigel Erskine,Rupert Gertisen,Dr Jeremy Green,Dr Susannah Helman,David Kaus,Robert J. King,Granville Allen Mawer,Maggie Patton,Erica Persak,Jon Rhodes,Denis Shephard,Dr Peter Sutton,Dr Martin Terry,Justine Van Mourik,Dr Brendan Whyte,Nat Williams,Dr Martin Woods,2013-11-01 The cover image World Map by Fra Mauro c 1450 is one of the most important and famous maps of all time This monumental map of the world was created by the monk Fra Mauro in his monastery on the island of San Michele in the Venetian lagoon Now the centrepiece of the Biblioteca Nazionale Marciana in St Marc s Square in Venice the map in its nearly 600 year

history has never left Venice until now Renowned for its sheer size over 2 3 metres square and stunning colours the map was made at a time of transition between the medieval world view and new knowledge uncovered by the great voyages of discovery Brilliantly painted and illuminated on sheets of oxhide the sphere of the Earth is surrounded by the sphere of the Ocean in the ancient way Yet Fra Mauro included the latest information on exploration by Portuguese and Arab navigators Commissioned by King Afonso V of Portugal it is the last of the great medieval world maps to inspire navigators in the Age of Discovery to explore beyond the Indian Ocean *Companion to the History of the Book* Simon Eliot,Jonathan Rose,2019-08-15 The celebrated text on the history of the book completely revised updated and expanded The revised and updated edition of *The Companion to the History of the Book* offers a global survey of the book's history through print and electronic text Already well established as a standard survey of the historiography of the book this new expanded edition draws on a decade of advanced scholarship to present current research on paper printing binding scientific publishing the history of maps music and print the profession of authorship and lexicography The text explores the many approaches to the book from the early clay tablets of Sumer Assyria and Babylonia to today's burgeoning electronic devices The expert contributions delve into such fascinating topics as archives and paperwork and present new chapters on Arabic script the Slavic Canadian African and Australasian book new textual technologies and much more Containing a wealth of illustrative examples and case studies to dramatize the exciting history of the book the text is designed for academics students and anyone interested in the subject *Printing a Mediterranean World* Sean Roberts,2013-02-26 In 1482 Francesco Berlinghieri produced the *Geographia* a book of over 100 folio leaves describing the world in Italian verse interleaved with lavishly engraved maps Roberts demonstrates that the *Geographia* represents the moment of transition between printing and manuscript culture while forming a critical base for the rise of modern cartography *Networked Nation* Jasper Cornelis van Putten,2017-11-06 In *Networked Nation Mapping German Cities* in Sebastian Münster's *Cosmographia* Jasper van Putten examines the groundbreaking woodcut city views in the German humanist Sebastian Münster's *Cosmographia* This description of the world published in Basel from 1544 to 1628 glorified the Holy Roman Empire of the German Nation and engendered the city book genre Van Putten argues that Münster's network of city view makers and contributors from German princes and artists to Swiss woodcutters draftsmen and printers expressed their local and national cultural identities in the views The *Cosmographia* and the city books it inspired offer insights into the development of German and Swiss identity from 1550 to Switzerland's independence from the empire in 1648 *The Social Life of Maps in America, 1750-1860* Martin Brückner,2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted We should not the ability to find meaning in maps is the fruit of a long process of exposure and instruction A carto coded America a nation in which maps are pervasive and meaningful had to be created The *Social Life of Maps* tracks American cartography's spectacular rise to its unprecedented cultural influence Between 1750 and 1860 maps did more than communicate geographic information and

political pretensions They became affordable and intelligible to ordinary American men and women looking for their place in the world School maps quickly entered classrooms where they shaped reading and other cognitive exercises giant maps drew attention in public spaces miniature maps helped Americans chart personal experiences In short maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts theatrical performances and the communication of emotions This lavishly illustrated study follows popular maps from their points of creation to shops and galleries schoolrooms and coat pockets parlors and bookbindings Between the decades leading up to the Revolutionary War and the Civil War early Americans bonded with maps Martin Br ckner s comprehensive history of quotidian cartographic encounters is the first to show us how *Cartographies of Culture* Damian Walford Davies,2012-06-15 *Cartographies of Culture* New Geographies of Welsh Writing in English offers a pioneering new examination of the links between maps and imaginative writing Concerned to draw literary studies and geography into a fruitful dialogue the book offers a genuinely interdisciplinary study of literary texts in relation to the spatialities of culture Taking the anglophone literature of Wales as its main data field the book offers a boldly imaginative and stringently theorised analysis of five literary maps What emerges is nothing less than a new way of reading literature through and as maps **Rediscovering the World** Benjamin Hennig,2012-12-14 We need new maps is the central claim made in this book In a world increasingly influenced by human action and interaction we still rely heavily on mapping techniques that were invented to discover unknown places and explore our physical environment Although the traditional concept of a map is currently being revived in digital environments the underlying mapping approaches are not capable of making the complexity of human environment relationships fully comprehensible Starting from how people can be put on the map in new ways this book outlines the development of a novel technique that stretches a map according to quantitative data such as population The new maps are called gridded cartograms as the method is based on a grid onto which a density equalising cartogram technique is applied The underlying grid ensures the preservation of an accurate geographic reference to the real world It allows the gridded cartograms to be used as basemaps onto which other information can be mapped This applies to any geographic information from the human and physical environment As demonstrated through the examples presented in this book the new maps are not limited to showing population as a defining element for the transformation but can show any quantitative geospatial data such as wealth rainfall or even the environmental conditions of the oceans The new maps also work at various scales from a global perspective down to the scale of urban environments The gridded cartogram technique is proposed as a new global and local map projection that is a viable and versatile alternative to other conventional map projections The maps based on this technique open up a wide range of potential new applications to rediscover the diverse geographies of the world They have the potential to allow us to gain new perspectives through detailed cartographic depictions **A Cultural History of Gardens in the Medieval Age** Michael Leslie,2015-04-02 The Middle Ages was a time of great upheaval the period between

the seventh and fourteenth centuries saw great social political and economic change The radically distinct cultures of the Christian West Byzantium Persian influenced Islam and al Andalus resulted in different responses to the garden arts of antiquity and different attitudes to the natural world and its artful manipulation Yet these cultures interacted and communicated trading plants myths and texts By the fifteenth century the garden as a cultural phenomenon was immensely sophisticated and a vital element in the way society saw itself and its relation to nature A Cultural History of Gardens in the Medieval Age presents an overview of the period with essays on issues of design types of gardens planting use and reception issues of meaning verbal and visual representation of gardens and the relationship of gardens to the larger landscape

Inventing Exoticism Benjamin Schmidt, 2015-01-21 As early modern Europe launched its multiple projects of global empire it simultaneously embarked on an ambitious program of describing and picturing the world The shapes and meanings of the extraordinary global images that emerged from this process form the subject of this highly original and richly textured study of cultural geography Inventing Exoticism draws on a vast range of sources from history literature science and art to describe the energetic and sustained international engagements that gave birth to our modern conceptions of exoticism and globalism Illustrated with more than two hundred images of engravings paintings ceramics and more Inventing Exoticism shows in vivid example and persuasive detail how Europeans came to see and understand the world at an especially critical juncture of imperial imagination At the turn to the eighteenth century European markets were flooded by books and artifacts that described or otherwise evoked non European realms histories and ethnographies of overseas kingdoms travel narratives and decorative maps lavishly produced tomes illustrating foreign flora and fauna and numerous decorative objects in the styles of distant cultures Inventing Exoticism meticulously analyzes these while further identifying the particular role of the Dutch Carriers of the World as Defoe famously called them in the business of exotica The form of early modern exoticism that sold so well as this book shows originated not with expansion minded imperialists of London and Paris but in the canny ateliers of Holland By scrutinizing these materials from the perspectives of both producers and consumers and paying close attention to processes of cultural mediation Inventing Exoticism interrogates traditional postcolonial theories of knowledge and power It proposes a wholly revisionist understanding of geography in a pivotal age of expansion and offers a crucial historical perspective on our own global culture as it engages in a media saturated world
