Establishment of a sound legal regulatory and institutional setting for PIM making sure it is linked to the budget process  
Allocation of roles and responsibilities for key players in PIM across government  
Strengthening of guidance on project preappraisal appraisal and selection prioritization procedures and deepening of project appraisal methodologies  
Integration of strategic planning project appraisal selection and capital budgeting  
Management of multiyear capital budget allocations and commitments  
Efforts to address effective implementation procurement and monitoring of projects  
Strengthening of asset management and ex post evaluation  
Integration of PIM and public private partnership PPP in a unified framework  
Rationalization and prioritization of the existing PIM project portfolio  
Development of a PIM database and information technology in the form of a PIM information system  
The PIM Reference Guide does not seek to provide definitive answers or standard guidance for the common PIM issues facing countries Nor does it seek to provide a detailed template for replication across countries this would be impossible given the diversity of country situations Instead each chapter begins with an overview of the specific reform issue lists approaches and experiences from different countries and summarizes the references and good practices to be considered in designing country specific reform actions
