Dunne, 2024 International Relations and History were once academic fields sharing a common concern with the affairs of empires states and nations Over the course of the twentieth century however they drifted apart International Relations largely retained the focus on the affairs and relations of these principal international actors but took a methodological turn leading to higher levels of theoretical abstraction History on the other hand retained the methods that define the discipline but shifted the focus veering away from matters of state to the vast array of actors events activities and issues that colour everyday life In recent years the drift has been arrested by scholars in each discipline who have turned towards the other discipline in their research International Relations has undergone a historiographical turn while History has taken an international turn Rise of the International brings together scholars of International Relations and History to capture the emergence and development of the thought the relations and the systems that have come to be called international in western discourse The evidence offered by contributors to the volume suggests there has been no single stable unchanging

concept or object of theoretical reflection or historical investigation that can be called the international but a variety of historically contingent conceptualizations across different contexts
