liquid into your flour to hydrate as you mix Arrange your flour in a volcano shape that is a mound with a crater at the center on a flat work surface or in a wide shallow bowl Add the liquid ingredients to the crater and break the yolks of the eggs if using with the tines of a fork Whisk the liquid slowly into the flour working from the center outwards Then when the dough is too stiff to mix with a fork use your hands to bring it all together Electric pasta makers take the muscle requirement out of your homemade dough after you add the ingredients into the chamber the machine does all the kneading for you which may seem like a worthwhile shortcut for those lacking in forearm strength But according to most chefs making pasta dough without equipment is easier than you d think and more foolproof yielding consistent better incorporated results Technically speaking bringing your dough together by hand before kneading it means you ll end up with a properly balanced mixture every time This helps account for variables in your dough that might make it looser or drier even when following the same recipe like the brand of AP flour you use or the size of your eggs
