

Turn on or wake

1. Press and release the power button on your Surface.

The lock screen appears with notifications for apps that have had activity. For more info, see [Notifications](#) in this guide.

2. To unlock Surface, swipe up from the bottom of the screen or press a key.
3. Sign in to Surface. Need help? See the [Accounts and sign in](#) section in this guide.

Tip You can set the amount of time before a password is needed to unlock your Surface. For more info, see [Choose when a password is required](#) in this guide.

InstantGo and hibernation

If you don't use Surface Pro 3 for a few minutes, the screen turns off and it goes into a power-saving sleep state called InstantGo. With InstantGo, your Surface wakes up instantly with your apps and data up to date.

If you don't use Surface for several hours, it will hibernate. Hibernation saves your work, and then turns off your Surface. When you start up your Surface again, you're back where you left off though not as fast as InstantGo.

To change when the screen dims or turns off, or when Surface Pro goes into sleep or InstantGo, see [Surface Pro battery and power](#) on Surface.com.

Change when Surface sleeps

If you don't use Surface Pro 3 for a while, the screen may dim or turn off to help preserve battery life. Here's where you can change these settings:

1. Open the Settings charm, tap or click **Change PC settings** > **PC and devices** > **Power and sleep**.
2. Under **Sleep**, choose when you want Surface to go to sleep (on battery and when plugged in).

Note If you'd like to make more changes to how Surface Pro 3 uses power, see [Power plans: Frequently asked questions](#) on Windows.com.
