Equation Everest Media,2022-04-30T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The quest to find a single theory that would unite all the forces of the cosmos and choreograph everything from the motion of the expanding universe to the most minute dance of subatomic particles was undertaken by some of the most eminent physicists in the world 2 The road to the unified field theory which is the theory that explains the universe was not made of point particles but of tiny vibrating strings has been littered with the corpses of failed attempts But many leading physicists believe that we are finally converging on the solution 3 String theory is a theory of everything but it also predicts a multiverse of universes This means that it may have an infinite number of solutions If our universe is one of many possibilities then which one is ours Equation of God Rocky Cosmo Manu,2010-04-13 Throughout early and modern

history many men have pondered the questions how why and what created the universe Of course most of these questions in early history were simply answered by appealing to the notion of a God or Gods However modern culture has progressed to a stage where these notions of God or Gods and their definitive meanings have to be questioned For example who exactly is God What is God Where does God exist in relation to the universe What role did God play in the creation of the universe Mans relationship to God must also be questioned his mind his thoughts his soul where is the connection Life death life after death where does it fit in to Gods big picture because for us to truly understand Gods purpose for existence we must first understand Gods method of creation For Gods method of creation will unlock mans mind and spirit from its physical boundary of isolation This book is a philosophical approach to the reality of creation evolution and the paradox of the universe it deals with Gods spiritual entity This is an answer to a question and an observation which forms a mental as well as visual understanding that climaxes into an equation of God *God's Equation* Amir D. Aczel,1999-12-12 **Putting God**

One Simple Equation David N. Heizer, 2020-03-17 The book One Simple Equation will take the reader on an inventive journey exploring Christian faith by introducing a revolutionary mathematical equation An equation that helped the author a devout atheist for forty two years discover and understand with complete clarity the truth of the Gospel and the power of God's love After coming to the realization that some of the greatest most promising theories in modern science share the same narrative as the Biblical description of creation God placed on author David Heizer's heart an equation that would ultimately bring him to Jesus Christ The equation $F = TL^3$ is a simple expression of Christian faith It is of profound importance that this book is rooted in God's love and His greatest expression of that love Jesus Christ The reader will learn why a mathematical expression of Christian faith illustrates our belief in God and Christ as our saviour so concisely All people understand Mathematics making it a universal language understood by all regardless of race nationality ethnicity or language 1 1 2 is the same for all human beings Math is also the language of God as all things in the universe God's creation can be expressed mathematically from the swirling motion of the planets and stars and the human genome to the computer programs and phone apps we use every day This fascinating equation will reveal to the reader Biblical truth and understanding Inspired by Einstein's theory of

relativity and God himself the equation is broken down into three simple terms F representing Faith what we are solving for T representing Trust which is a variable that changes from one day to the next and L representing God's Love a steadfast never changing never failing constant we can all rely on Raising God's love to the power of three represents the Trinity the Father Son and Holy Spirit The more Trust we apply to God's love the greater our faith becomes Read the testimonies of people getting through life's most difficult challenges by placing their trust in God's love The reader will then be taken through a series of chapters that replace the constant love of God with other idolatrous terms such as money material possessions addictions and the self and how these temporary corruptible terms fail at producing a sound faith on which to build life giving principles This one simple equation unlocks the meaning of life and answers one of the most difficult questions facing Christians today How can a loving God allow bad things to happen to good people This simple yet profound illustration of our faith reveals all this and much more

The God Equation Mike Hockney, 2013-08-26 Euler's Formula is the most beautiful equation in mathematics Yet it's much more It governs the universe and defines the soul Euler's Formula perfectly complements Leibniz's Monadology They form the most powerful intellectual combination ever capable of establishing a true grand unified theory of everything including religion It provides a rational explanation of near death and out of body experiences and homeopathy It overturns Einstein's principle of relativity providing the same results via an absolute framework that restores the reality principle In this groundbreaking book we provide the solution to the Cartesian mind body problem via the Fourier transform which has the Euler Formula as its engine We present the Riemann sphere which works in perfect harmony with the Euler Formula as the ideal working model of the human soul And we give the first ever technical explanation of the process of reincarnation The Euler equation is everything you thought and more It's divine

The Mathmos Mike Hockney, 2014-09-12 The universe is nothing like how it appears to us So what's it really like What is it in itself Neither our senses nor any experiments can reveal the ultimate truth of existence Fortunately one thing can reason We inhabit the Mathmos the mathematical cosmos This book reveals the compelling secrets of the hidden reality that we will never once see but we can surely know thanks to mathematics Do we live in a rational universe or a random universe This is the choice between a mathematical universe and a scientific universe The mathematical universe has a rational ultimate answer the scientific universe does not The scientific universe is magicked out of non existence as if out of a magician's top hat Are you a member of the magicians cult of science Nothing is more alchemical than modern science You can generate a cosmos out of randomness in nothingness which is a much greater trick than merely manufacturing gold from lead

Description Product Description Michio Kaku renowned theoretical physicist and 1 New York Times bestselling author of *The Future of the Mind* and *The Future of Humanity* tells the story of the greatest quest in all of science When Newton discovered the law of gravity he unified the rules governing the heavens and the Earth Since then physicists have been

placing new forces into ever grander theories But perhaps the ultimate challenge is achieving a monumental synthesis of the two remaining theories relativity and the quantum theory This would be the crowning achievement of science a profound merging of all the forces of nature into one beautiful magnificent equation to unlock the deepest mysteries in science What happened before the Big Bang What lies on the other side of a black hole Are there other universes and dimensions Is time travel possible Why are we here Kaku also explains the intense controversy swirling around this theory with Nobel laureates taking opposite sides on this vital question It is a captivating gripping story what s at stake is nothing less than our conception of the universe Written with Kaku s trademark enthusiasm and clarity this epic and engaging journey is the story of *The God Equation* Disclaimer This is not the main book It is a summary of *The God Equation* by Michio Kaku It is comprehensive and a guide to the main book and does not replace the main book in any form *The Fire in the Equations* Kitty Ferguson,1994 **The God Blunder** Mike Hockney,2013-07-28 What is the most ingenious error in the history of science so difficult to detect that only a genius could manage it In any collection of data the figure most obviously correct beyond all need of checking is the mistake Finagle s Third Law Arthur Bloch One of the foundation stones of modern physics the most obviously correct beyond all need of checking and devised by one of the greatest geniuses of all is the catastrophic blunder that is preventing scientists from unifying quantum theory and general relativity Join us on the strangest detective case of all finding the weapon that has murdered science This is the ultimate whodunnit *The God Equation and Other Stories* Michael A. find the ultimate answers This debate allows us to make sense of a foundational problem of science why science is totally dependent on mathematics even though the mathematical method contradicts the scientific method in every way Mathematics is for thinking types rationalists science for sensing types empiricists These are two totally different types of people Never get them confused You have to choose a side The supreme question is whether reality is scientific material particular sensible or mathematical mental universal intelligible To put it another way is reality dead or alive Is it a mechanism or an organism Is it stupid with no purpose as science says or is it intelligent and relentlessly calculating the answer to itself and driving itself to perfect completion as it must if it is mathematical Are you smart enough to understand the answer Most people aren't According to Kurt Godel a global conspiracy has been in place for centuries to stop humanity from studying Leibniz the supreme rationalist and thus through this neglect to make men stupid There might as well be a global conspiracy given how far mathematical rationalism has fallen in order to create space for scientific empiricism its philosophical opposite Scientists the people of the senses even claim to be champions of reason and logic As if It's time for the greatest paradigm shift of all from scientific empiricism to mathematical rationalism from sensing to thinking from observation to logic from matter to mind
