a truly integrated curriculum creatively Exploring how we can make connections in the classroom through our own lives and those of our children it supports teachers in becoming more personally involved in decisions about the style of teaching and substance of curriculum in schools Applying Cross Curricular Approaches Creatively examines key topics such as Educationalists with an interest in cross curricular and creative approaches Planning for and provoking creativity Choosing cross curricular themes Mind full approaches to teaching and learning Assessing creative and integrated learning Teachers as researchers in the classroom Applying Cross Curricular Approaches Creatively is an essential text for those wishing to plan a coherent curriculum with cross curricular elements It places the basics of knowledge genuine motivation engagement and participation at the core of its arguments for meaningful learning for all children Filled with autobiographical accounts and case studies and with ready to use ideas for creative lessons this uplifting book challenges us to return to curriculum breadth and balance and away from a one size fits all approach What if everything you knew about education was wrong? David Didau, 2015-06-10 If you feel a bit cross at the presumption of some oik daring to suggest everything you know about education might be wrong please take it with a pinch of salt What if everything you knew about education was wrong is just a title Of course you probably think a great many things that aren t wrong The aim of the book is to help you murder your darlings David Didau will question your most deeply held assumptions about teaching and learning expose them to the fiery eye of reason and see if they can still walk in a straight line after the experience It seems reasonable to suggest that only if a theory or approach can withstand the fiercest scrutiny should it be encouraged in classrooms David makes no apologies for this why wouldn't you be sceptical of what you re told and what you think you know As educated professionals we ought to strive to assemble a more accurate informed or at least considered understanding of the world around us Here David shares with you some tools to help you question your assumptions and assist you in picking through what you believe He will stew findings from the shiny white laboratories of cognitive psychology stir in a generous dash of classroom research and serve up a side order of experience and observation Whether you spit it out or lap it up matters not If you come out the other end having vigorously and violently disagreed with him you ll at least have had to think hard about what you believe The book draws on research from the field of cognitive science to expertly analyse some of the unexamined meta beliefs in education In Part 1 Why we re wrong David dismantles what we think we know examining cognitive traps and biases assumptions gut feelings and the problem of evidence Part 2 delves deeper Through the threshold looking at progress liminality and threshold concepts the science of learning and the difference between novices and experts In Part 3 David asks us the guestion What could we do differently and offers some considered insights into spacing and interleaving the testing effect the generation effect reducing feedback and why difficult is desirable While Part 4 challenges us to consider What else might we be getting wrong cogitating formative assessment lesson observation grit and growth differentiation praise motivation and creativity Teaching Children 3-11 Anne D Cockburn, Graham Handscomb, 2011-11-11 Focusing on the major topics underpinning
