story of the huntin dog and the kennel dog illustrates how many executives don t understand the difference between the two and often place kennel dogs in positions of higher authority when a good huntin dog would have been a much better choice for the company s success The story of the gloves illustrates how senior managers will make seeming small decisions of which they have little knowledge and that should be made by the shop floor This lack of understanding of what is actually happening on the shop floor leads to higher costs and lower profitability and indeed puts the company s business future at risk If you want to know about the problems with the work ask the workers It is hoped that these and over 30 other stories provided will help all who read them take away lessons they can apply in their business to make it more successful
