Ullmann's Food and Feed, 3 Volume Set Wiley-VCH,2017-06-19 A compilation of 58 carefully selected topical articles from the Ullmann's Encyclopedia of Industrial Chemistry, this three volume handbook provides a wealth of information on economically important basic foodstuffs, raw materials, additives and processed foods, including a section on animal feed. It brings together the chemical and physical characteristics, production processes and production figures, main uses, toxicology and safety information in one single resource. More than 40 % of the content has been added or updated since publication of the 7th edition of the Encyclopedia in 2011 and is available here in print for the first time. The result is a best of Ullmann's bringing the vast knowledge to the desks of professionals in the food and feed industries.

Advances in Vinegar Production Argyro Bekatorou,2019-09-11 In industrial vinegar production there are three main types of methods involved: the slow handcrafted traditional method, Orleans or French method and the rapid submerged and generator methods. The current trend is to fuse traditional techniques with state of the art technologies and a variety of approaches have been developed to increase fermentation efficiency and reduce cost and fermentation time. This book reports on all the recent innovations in vinegar production and compares them to the traditional submerged fermentation systems. The new trends on raw materials, substrate pretreatment strategies, alcoholic fermentation and acetic acidification
