areas of Yellowstone and Grand Teton that many visitors miss from marvelous Firehole Canyon to the ever changing face of Norris Geyser Basin from Flagg Ranch to the geologic wonders of the Gros Ventre Slide area Inside you ll find Itineraries ranging from 5 miles to 155 miles in length Full color photos and route maps for each drive In depth descriptions of attractions along the way Historical information and suggested side trips Optional side trips to museums parks and landmarks Tips on lodging camping dining travel services and best driving seasons *Engineering Eden* Jordan Fisher Smith,2016-06-07 The fascinating story of a trial that opened a window onto the century long battle to control nature in the national parks When twenty five year old Harry Walker was killed by a bear in Yellowstone Park in 1972 the civil trial prompted by his death became a proxy for bigger questions about American wilderness management that had been boiling for a century At immediate issue was whether the Park Service should have done more to keep bears away from humans but what was revealed as the trial unfolded was just how fruitless our efforts to regulate nature in the parks had always been The proceedings drew to the witness stand some of the most important figures in twentieth century wilderness management including the eminent zoologist A Starker Leopold who had produced a landmark conservationist document in the 1950s and all American twin researchers John and Frank Craighead who ran groundbreaking bear studies at Yellowstone Their testimony would help decide whether the government owed the Walker family restitution for Harry s death but it would also illuminate decades of patchwork efforts to preserve an idea of nature that had never existed in the first place In this remarkable excavation of American environmental history nature writer and former park ranger Jordan Fisher Smith uses Harry Walker s story to tell the larger narrative of the futile sometimes fatal attempts to remake wilderness in the name of preserving it Tracing a course from the founding of the national parks through the tangled twentieth century growth of the conservationist movement Smith gives the lie to the portrayal of national parks as Edenic wonderlands unspoiled until the arrival of Europeans and shows how virtually every attempt to manage nature in the parks has only created cascading effects that require even more management Moving across time and between Yellowstone Yosemite and Glacier national parks *Engineering Eden* shows how efforts at wilderness management have always been undone by one fundamental problem that the idea of what is wild dissolves as soon as we begin to examine it leaving us with little framework to say what wilderness should look like and which human interventions are acceptable in trying to preserve it In the tradition of John McPhee s *The Control of Nature* and Alan Burdick s *Out of Eden* Jordan Fisher Smith has produced a powerful work of popular science and environmental history grappling with critical issues that we have even now yet to resolve **Varmints and Victims** Frank Van Nuys,2015-11-09 It used to be If you see a coyote shoot it Better yet a bear Best of all perhaps A wolf How we ve gotten from there to here where such predators are reintroduced protected and in some cases revered is the story Frank Van Nuys tells in *Varmints and Victims* a thorough and enlightening look at the evolution of predator management in the American West As controversies over predator control rage on *Varmints and Victims* puts the debate into historical context tracing the

West's relationship with charismatic predators like grizzlies, wolves and cougars from unquestioned eradication to ambivalent recovery efforts. Van Nuys offers a nuanced and balanced perspective on an often emotional topic exploring the intricacies of how and why attitudes toward predators have changed over the years. Focusing primarily on wolves, coyotes, mountain lions and grizzly bears, he charts the logic and methods of management practiced by ranchers, hunters and federal officials. Broad in scope and rich in detail, this work brings new, much needed clarity to the complex interweaving of economics, politics, science and culture in the formulation of ideas about predator species and in policies directed at these creatures. In the process, we come to see how the story of predator control is in many ways the story of the American West itself, from early attempts to connect the frontier region to mainstream American life and economics to present ideas about the nature and singularity of the region.

Yellowstones Survival Susan G. Clark, 2021-05-15 This book focuses on Yellowstone, the park, the larger ecosystem and even more so, the idea of Yellowstone. In presenting a case for a new conservation paradigm for the Greater Yellowstone Ecosystem (GYE) including Yellowstone National Park, the book at its heart is about people and nature relationships. This new paradigm will be truly committed to a healthy, sustainable environment rich in other life forms and one that affords dignity for all humans and nonhumans. The new story or paradigm must be about living such a commitment and future for GYE in real time. The book presents a well-developed theory for interdisciplinary problem solving that is grounded in practice.

The Science of Stories M. Jones, E. Shanahan, M. McBeth, 2014-12-03 The study of narratives in a variety of disciplines has grown in recent years as a method of better explaining underlying concepts in their respective fields. Through the use of Narrative Policy Framework (NPF), political scientists can analyze the role narrative plays in political discourse.

National Parks, 1997-11 The flagship publication of the National Parks Conservation Association, *National Parks Magazine* (circ 340,000) fosters an appreciation of the natural and historic treasures found in the national parks, educates readers about the need to preserve those resources and illustrates how member contributions drive our organization's park protection efforts. *National Parks Magazine* uses images and language to convey our country's history and natural landscapes from Acadia to Zion, from Denali to the Everglades and the 387 other park units in between.

[Collaborative Land Use Management](#) Robert J. Mason, 2008 *Collaborative Land Use Management: The Quieter Revolution in Place-Based Planning* discusses the less regulatory approaches to land use management that have emerged over the past 35 years, analyzing the collective value of such place-based planning approaches as land trusts, open space ballot measures, watershed conservancies, ecoregional plans and smart growth initiatives. *Collaborative Land Use Management* appraises these trends from physical, social, economic, civic and environmental justice perspectives.
