Proceedings of the Ninth International Cryogenic Engineering Conference, Kobe, Japan, 11-14 May 1982 K. Yasukochi, H. Nagano, 2013-10-08 Proceedings of the Ninth International Cryogenic Engineering Conference Kobe Japan 11-14 May 1982 contains the papers presented during the entirety of the conference. The overall focus is on the presentation of technical developments and new applications in the field of cryogenics. The topics covered during the conference include high speed magnetic levitation train magnetic fusion energy and its cryogenic applications and cooling effects in a vortex cooler. Superconductivity and fusion digital applications of the Josephson effect thermally activated stirling cryocooler and large cryogenic systems of the energy doubler are discussed as well. Physicists, chemists, engineers and researchers in the field of cryogenics will find the compendium very insightful. **Japanese Technical Abstracts**, 1987 Moody's International Manual, 1997 **Chemical Engineering Abstracts**, 1988 Advances in Cryogenic Engineering R.W. Fast, 2012-12-06. The 1989 Cryogenic Engineering Conference meeting jointly with the International Cryogenic Materials Conference was held on the campus of the University of California Los Angeles from July 24 to 28. Professor T H K Frederking was the conference chairman. The Conference had previously met at U C L A in 1962 and 1969. A special symposium A Half Century of Superfluid Helium was a significant part of the program of CEC 89. We were especially fortunate to have Professor Jack Allen of the University of St Andrews Scotland present at the Conference. His paper Early Superfluidity in Cambridge 1936 to 1939 was a delightful often humorous account of the early experimental work with superfluid helium. Professors V L Ginzburg and J L Olesen could not be present for the Symposium but provided papers which are published in these proceedings. The late Bill Fairbank responding graciously to a last minute invitation from Professor Frederking presented a wonderful account of superfluid research in the United States in the post war years.
