[Achieving Service Excellence](#) C. M. Chang, 2013-11-20 As the service sectors play an increasingly important role in all economies worldwide service executives and professionals are well advised to recognize two main pathways to achieving

sustainable success in services The first path requires enhancing the strategic differentiation and operational excellence of their service enterprises the second requires that these executives and their employees develop the knowledge and skills needed to achieve such success Specifically this book discusses actionable methodologies needed to generate creative ideas including deciding on which ones to pursue on how to justify projects financially on how to manage the development projects for innovative services and on how to reach out to customers and offer them superior service support **Forthcoming Books** Rose Arny,2000 **Study Guide for Use with Financial Accounting** Robert Libby,Patricia A. Libby,Daniel G. Short,2003 Libby Libby Short wrote this text based on their belief that the subject of financial accounting is inherently interesting but financial accounting textbooks are often not They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business When writing this text they considered career relevance as their guide when selecting material and the need to engage the student as their guide to style pedagogy and design Libby Libby Short is the only financial accounting text to successfully implement a real world single focus company approach in every chapter Students and instructors have responded very favorably to the use of focus companies and the real world financial statements The companies chosen are engaging and the decision making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting
