Psychology Applied to Teaching Jack Snowman, Robert Frederick Biehler, 2006 Scaling up excellence is the key to creating a great organisation It s how a small enterprise expands without losing focus It s how a brilliant new idea or plan developed by the few goes on to be adopted by the many And in hard times and tough situations it s how pockets of smart new thinking overcome cultures of indifference or negativity An organisation that doesn t know how to scale up what is best within it won t achieve long term success Bestselling author Robert Sutton and his Stanford colleague Huggy Rao have devoted nearly a decade to uncovering what it takes to create and spread outstanding performance and in *Scaling Up Excellence* they share the fruits of their research Drawing on case studies that range from Silicon Valley enterprises to non profit organisations they provide crucial insights into corporate cultures both good and bad and offer a road map for establishing and stimulating excellence In the process they show how to use premortems when making big decisions about change They reveal why seven is so often the magic number when it comes to team size They examine successful and unsuccessful quests for improvement u in hospitals schools and elsewhere And they discuss when a single corporate mindset is best Catholicism and when local variation is preferable Buddhism *Scaling Up Excellence* is the first management book devoted to what is u or should be u a core priority for every organisation As such it is destined to become the standard bearer

Thinking Collaboratively D. Randy Garrison, 2015-06-05 *Thinking Collaboratively* is a theoretical and practical guide to thinking and learning in deep and meaningful ways within purposeful communities of inquiry Critical thinking has long been recognized as an important educational goal but until now has largely been conceived and operationalized as an individual attitude and ability Increasingly however a more relevant and complete cognitive construct has been emerging thinking collaboratively Thinking collaboratively is the means to inquire test and apply new understandings and to make sense of the information that bombards us continuously In short thinking collaboratively is required to flourish in our highly connected world and in this book based on more than a decade of research Garrison provides an essential introduction to this vital concept

Post-Enlightenment Self-Education Eugene Matusov, 2025-06-16 The book aims to challenge and redefine the traditional Enlightenment approach to education by advocating for a Post Enlightenment model that emphasizes self education rooted in individual autonomy dignity and diverse experiences It critiques the Enlightenment s narrow focus on rationality and hierarchy proposing a more inclusive and personalized method that values emotional intelligence and contextual understanding The book seeks to promote a radical shift towards educational pluralism where learning is driven by the learner s own needs interests and judgments rather than imposed by external authorities Ultimately it calls for a reimagined educational paradigm that aligns with the principles of universal human dignity and autonomy envisioning a future where education is a personal and existential pursuit supported by democratic societal structures
