## **Library Of Human Security Japans Triple Disaster:**

**Human Security and Japan's Triple Disaster** Paul Bacon, Christopher Hobson, 2014-06-27 Japan has been one of the most important international sponsors of human security yet the concept has hitherto not been considered relevant to the Japanese domestic context This book applies the human security approach to the specific case of the earthquake tsunami and nuclear accident that struck Japan on 11 March 2011 which has come to be known as Japan's triple disaster This left more than 15 000 people dead and was the most expensive natural disaster in recorded history The book identifies the many different forms of human insecurity that were produced or exacerbated within Japan by the triple disaster Each chapter adds to the contemporary literature by identifying the vulnerability of Japanese social groups and communities and examining how they collectively seek to prevent respond to and recover from disaster Emphasis is given to analysis of the more encouraging signs of human empowerment that have occurred Contributors draw on a wide range of perspectives from disciplines such as disaster studies environmental studies gender studies international relations Japanese studies philosophy and sociology In considering this Japanese case study in detail the book demonstrates to researchers postgraduate students policy makers and practitioners how the concept of human security can be practically applied at a policy level to the domestic affairs of developed countries countering the tendency to regard human security as exclusively for developing states **Human**

**Security and Natural Disasters** Christopher Hobson, Paul Bacon, Robin Cameron, 2014-03-26 Human security is an approach that rejects the traditional prioritization of state security and instead identifies the individual as the primary referent of security It offers a way of broadening our perspective and recognizing that the most pressing threats to individuals do not come from interstate war but from the emergencies that affect people every day such as famine disease displacement civil conflict and environmental degradation Human security is about people living their lives with dignity being free from fear and want To date there has been a strong tendency to focus on insecurity caused by civil conflict with less attention on issues to do with environmental security This volume addresses the threat posed by natural disasters which represent an increasingly major human security threat to people everywhere In looking at natural disasters this book also refines the human security approach It does so through developing its previously unexplored interdisciplinary potential This volume explicitly seeks to bring the human security approach into conversation with contributions from a range of disciplines development disaster sociology gender studies international law international relations philosophy and public health Collectively these scholars unpack the human element of natural disasters In doing so an emphasis is placed on how pre-existing vulnerabilities can be gravely worsened as well as the interconnected nature of human security threats The book presents a variety of case studies that include the Indian Ocean tsunami Hurricane Katrina the 2010 Haiti earthquake and the 2011 triple disasters in Japan **Uranium** Anthony Burke, 2017-07-03 Uranium the most atomically unstable natural element on earth has a unique place in the global geopolitics of resources It provides energy to millions of people and its

isotopes are used to power spacecraft and in nuclear medicine But it is also at the heart of many of the planet's most deadly threats including nuclear devastation and radioactive waste Its mining has caused bitter conflict with indigenous peoples and its testing in nuclear weapons has left a toxic legacy Yet the nonproliferation regime which aims to phase out nuclear weapons and manage the risks of nuclear energy is at risk of unravelling In this book Anthony Burke explores the geopolitical intrigue around uranium and the dilemmas of justice and security to which its development has given rise The twenty first century he cautions will be a time of reckoning and new reserves of political will must be found to manage the impact of this extraordinary mineral Only by cooperating to achieve multilateral disarmament and greater international control over nuclear power can we ward off nuclear catastrophe and harness the potential of nuclear energy to help address rather than create some of the world's most pressing problems

Rethinking Humanitarian Intervention in the 21st Century Aiden Warren, 2017-06-02 Since the end of the Cold War humanitarian interventions have continued to evolve and respond to a wide range of political crises These insightful essays focus on the challenges associated with interventions when facing conflict and human rights violations unmitigated systematic violence state re building human mobility and dislocation Each chapter is linked to the rest through three defining themes that permeate the book the evolution of humanitarian interventions in a global era the limits of sovereignty and the ethics of interventions and the politics of post intervention re building and humanitarian engagement The authors incorporate a variety of case studies including Kosovo Timor Leste Syria Libya and Iraq and examine the complexity of interventions across their different dimensions including relevant doctrines such as R2P Use of Force and Human Security
