Schild,2024-06-04 The complex interactions between the innate and adaptive immune systems function to recognize and clear pathogens or transformed cells but inefficient interactions between these two systems can result in harmful immunologic responses including chronic infections and the development of cancer Several hallmarks of dysfunctional adaptive immune responses often detected in tumors share specific features with ineffective immunity in chronic infections The members of the microenvironment actively participate in the process of tumorigenesis or chronification of infection by modulating innate and adaptive immune system interactions leading e g to insufficient T cell responses The best example is given by the acquisition of an exhausted state of cytotoxic CD8 T cells CTLs responding to chronic infections or tumors that are associated with elevated expression of inhibitory receptors and impaired cytokine response Targeting these major inhibitory pathways by immune checkpoint blockers represents a prime example of successful clinical translation of tumor specific immunotherapies Understanding the mechanisms behind mal adaptations of the immune system is crucial for achieving therapeutic benefits The establishment and co evolution of a dynamic microenvironment niche constituted by the recruitment of numerous cell types dampen immune responses and thus contribute to the development of neoplastic transformation as well as infection Although there are examples of successful immunotherapeutic approaches CAR T cells immune checkpoint inhibitors or mRNA vaccination a large percentage of patients with cancer or chronic infections still do not benefit from these therapies or develop severe immune related adverse events The reasons for these failures are not well understood A possible explanation might be that current immunotherapies target predominantly the effector arm of the immune system by trying to reactivate dysfunctional T cells but do not sufficiently address the influence of the innate immune system and the contributions of the tumor microenvironment TME niche The main problem we would like to address in this special issue is how inappropriate function of the innate immune system affects adaptive immunity and contributes to inefficient anti cancer immunity and chronification of infections The central goal is to provide a more precise understanding of the various common and novel immune evasion mechanisms in cancers and in chronic infections to obtain a detailed map of common and disease specific immune escape checkpoints To that aim we want to compile a wide array of interdisciplinary studies exploring a comparative and multi layered analysis of mechanisms responsible for inefficient immune responses including novel approaches i e multi omics or epigenetic signaling We would also like to combine studies from different fields including basic and clinical immunology oncology and virology microbiology We welcome the submission of Original Research Review Mini Review Methods Case report and Perspective articles that cover but are not limited to the following topics Convergent mechanisms supporting immune escape in preclinical models tumors and chronic infections Convergent evasion mechanisms mediated by tumor infiltrating suppressive cells Treg MDSC macro phages soluble mediators signaling metabolism Convergent immune evasion mechanisms mediated by chronic infection viral or parasite Novel strategies to modulate the TME by direct or indirect targeting of immune suppressor cells Approaches to enhance persistence and

resilience of anticancer T cells Combinatorial therapeutic strategies mRNA antibodies immune checkpoint blockers that target convergent immune evasion mechanisms Manuscripts consisting solely of bioinformatics or computational analysis of public genomic or transcriptomic databases which are not accompanied by robust and relevant validation clinical cohort or biological validation in vitro or in vivo are out of scope for this topic

Navigating Theory, Methodology, and Researcher Development in Doctoral Research Throne, Robin, 2025-06-25 Doctoral research involves more than investigating a specific topic It requires navigating a complex landscape of theory methodology and personal development as a researcher These three elements are interconnected as theory shapes questions asked methodology guides answers and the process produces independent scholars Successfully managing these aspects demands reflection adaptability and a deep engagement with academic traditions and new research practices This may produce new knowledge while fostering the growth of researchers who contribute meaningfully to their fields

Navigating Theory Methodology and Researcher Development in Doctoral Research explores various practices in doctoral research practices It examines evolving methodologies theories and developments for improved research applications This book covers topics such as higher education research methods and social science and is a useful resource for librarians educators academicians researchers and scientists

The Foundations of the Aarhus Convention Emily Barritt, 2020-10-29 This important new monograph offers an innovative new analysis of the Aarhus Convention Environmental law is dense with monolithic concepts from environmental democracy to intergenerational justice from sustainable development to stewardship Each concept generates its own mythology about what environmental law should aspire to Sometimes these ideas become so big that we lose hold of their meaning and therefore what we allude to when we describe environmental law in such terms No more so is this true than in relation to the Aarhus Convention an ambitious instrument of environmental law that promotes public participation and access to justice in relation to the environment Since its inception it has been revered in glowing terms and praised variously for its contribution to citizenship environmental responsibility and democratic legitimacy But how are we to know whether these descriptions are mere puffs or genuine statements about the Convention's character This book digs deep into the foundations of the Aarhus Convention examining its ambitious potential through the lens of three foundational purposes environmental rights democracy and stewardship In so doing it contributes to our understanding both of the Convention and our understanding of three important purposes that inhabit environmental law unravelling and reassembling them to build meaning into our broad brush descriptions

REST APIs Step by Step: A Practical Guide with Examples William E. Clark, 2025-04-21. REST APIs Step by Step: A Practical Guide with Examples provides a comprehensive introduction to designing, building and maintaining RESTful web APIs for real world applications. Covering the essential principles of REST architecture, HTTP fundamentals and data exchange formats, the book offers a structured approach to understanding the mechanics and rationale behind effective API development. Through concise explanations and illustrative examples, readers gain clarity on how core API components interact and why best practices matter. The book proceeds through practical guidance on constructing robust REST APIs, including resource modeling, endpoint design, HTTP method usage, payload structuring and versioning strategies. Dedicated sections address error handling, data validation, authentication, authorization and rate limiting, delivering actionable solutions to common API challenges. Readers are also guided through the full implementation process with modern frameworks, real world use cases and recommendations for seamless integration with data sources. Designed for software developers, system architects and technical leads, this guide ensures that readers acquire a solid foundation in REST API development regardless of prior experience. The book emphasizes not only the creation of functional APIs but also their long term maintenance, security, scalability and documentation. By following the step by step approach, readers will be equipped to deliver APIs that are reliable, efficient and

easy to use across diverse software ecosystems **Task-Based Language Teaching in Foreign Language Contexts** Ali Shehadeh, Christine A. Coombe, 2012-10-17 This volume extends the Task Based Language Teaching Issues Research and Practice books series by deliberately exploring the potential of task based language teaching TBLT in a range of EFL contexts It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts particularly where English is not the dominant language By including contributions from settings as varied as Japan China Korea Venezuela Turkey Spain and France this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse not least because it must respond to the distinct contexts constraints and possibilities of foreign language learning The book will be of interest to SLA researchers and students in applied linguistics and TESOL It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners **The Transmission of Anglo-Norman** Richard P. Ingham, Richard Ingham, 2012 This investigation contributes to issues in the study of second language transmission by considering the well documented historical case of Anglo Norman Within a few generations of the establishment of this variety its phonology diverged sharply from that of continental French yet core syntactic distinctions continued to be reliably transmitted The dissociation of phonology from syntax transmission is related to the age of exposure to the language in the experience of ordinary users of the language The input provided to children acquiring language in a naturalistic communicative setting even though one of a school institution enabled them to acquire target like syntactic properties of the inherited variety In addition it allowed change to take place along the lines of transmission by incrementation A linguistic environment combining the here and now aspects of ordinary first language acquisition with the growing cognitive complexity of an educational meta language appears to have been adequate for this variety to be transmitted as a viable entity that encoded the public life of England for centuries **ASME Technical Papers** ,1983
