Görög, 2000-05-19 Impurity profiling is the common name of a group of analytical activities the aim of which is the detection identification structure elucidation and quantitative determination of organic and inorganic impurities as well as residual solvents in bulk drugs and pharmaceutical formulations Since this is the best way to characterise the quality and stability of bulk drugs and pharmaceutical formulations this is the core activity in modern drug analysis Due to the very rapid development of the analytical methodologies available for this purpose and the similarly rapid increase of the demands as regards the purity of drugs it is an important task to give a summary of the problems and the various possibilities offered by modern analytical chemistry for their solution That is the aim of this book The book is methodology oriented In the first chapter some important aspects of the background of impurity related analytical studies toxicological pharmacopoeial aspects the characterisation of the sources of impurities and the role of impurity profiling in various fields of drug research production and therapeutic use are summarised Chapter two deals with related organic impurities the strategies for impurity profiling the use of chromatographic and related separation methods spectroscopic and hyphenated techniques The subject of the third chapter is the identification and determination of residual solvents The determination of inorganic impurities is discussed in chapter four The special problems of degradation products as impurities are dealt with in chapter five A separate chapter has been compiled to deal with one of the most up to date problems in contemporary pharmaceutical analysis the estimation of enantiomeric purity of chiral drugs Chapter seven is devoted to

various approaches to solve the problem of polymorphic modifications as impurities Since in the broader sense of the word the microbiological purity of drugs and drug products also belongs to this circle the most important information from this field is summarised in chapter eight After the mainly methodology oriented chapters the final one concentrates on four groups of drugs peptides biotechnological products antibiotics and steroids in order to demonstrate the use of the methods described earlier

Frontiers of Sulfur Metabolism in Plant Growth, Development, and Stress Response Stanislav Kopriva,Dibyendu Talukdar,Hideki Takahashi,Rüdiger Hell,Agnieszka Sirko,Stanislaus F. D' Souza,Tulika Talukdar,2016-09-07 Growing plants have a constitutive demand for sulfur to synthesize proteins sulfolipids and other essential sulfur containing molecules for growth and development The uptake and subsequent distribution of sulfate is regulated in response to demand and environmental cues The importance of sulfate for plant growth and vigor and hence crop yield and nutritional quality for human and animal diets has been clearly recognized The acquisition of sulfur by plants however has become an increasingly important concern for the agriculture due to the decreasing S emissions from industrial sources and the consequent limitation of inputs from atmospheric deposition Molecular characterization involving transcriptomics proteomics and metabolomics in Arabidopsis thaliana as well as in major crops revealed that sulfate uptake distribution and assimilation are finely regulated depending on sulfur status and demand and that these regulatory networks are integrated with cell cycle photosynthesis carbohydrate metabolism hormonal signaling uptake and assimilation of other nutrients etc to enable plant growth development and reproduction even under different biotic and abiotic stresses This knowledge can be used to underpin approaches to enhance plant growth and nutritional quality of major food crops around the world Although considerable progress has been made regarding the central role of sulfur metabolism in plant growth development and stress response several frontiers need to be explored to reveal the mechanisms of the cross talk between sulfur metabolism and these processes In this research topic the knowledge on plant sulfur metabolism is reviewed and updated Focus is put not only on molecular mechanisms of control of sulfur metabolism but also on its integration with other vital metabolic events The topic covers 4 major areas of sulfur research sulfate uptake assimilation and metabolism regulation and role in stress response We hope that the topic will promote interaction between researchers with different expertise and thus contribute to a more integrative approach to study sulfur metabolism in plants

Dietary fibre: new frontiers for food and health

J.W. van der Kamp,J.M. Jones,B.V. McCleary,D.L. Topping,2023-09-04 Dietary fibre research is rapidly evolving and is stimulated by the growing attention for intestinal health which is needed for combating major disorders such as diabetes cardio vascular diseases and obesity Current research also explores relationships between fibres the immune system and stress The recently agreed EU and CODEX definitions for dietary fibre including all polymeric carbohydrates not digested in the small intestine provide both clarity and new challenges regarding adequate analysis and concerning the requirements for

added fibre Added fibre should have a physical effect of benefit to health as demonstrated by generally accepted scientific evidence to competent authorities Novel research tools from genomics toolboxes and advanced systems simulating the gastrointestinal tract are enabling researchers to obtain insights in the wide range of structure function relationships of different types of dietary fibre These include the impact of dietary fibre on the gut microbiota and relationships between prebiotics and peptides involved in regulation of satiety and other functions New technologies steadily increase the range of fibres with and without anti oxidants and other beneficial co passengers which are available to food processors Dietary fibre new frontiers for food and health covers the most up to date research available on dietary fibre and will be an indispensable tool for all scientists and technologists involved in research and development in this field
