Respectfully Catholic and Scientific traces the unexpected manner in which several influential liberal progressive Catholics tried to shape how evolution and birth control were framed and debated in the public square in the era between the World Wars and the unintended consequences of their efforts A small but influential cadre of Catholic priests professionally trained in social sciences Frs John Montgomery Cooper John A Ryan and John A O'Brien gained a hearing from mainline public intellectuals largely by engaging in dialogue on these topics using the lingua franca of the age science to the near exclusion of religious argumentation The Catholics approach was more than just tactical It also derived from the subtle influence of Catholic theological Modernism with its strong enthusiasm for science and from an inclination toward scientism inherited from the Progressive Era s social science milieu All three shared a fervent desire to translate the Catholic ethos as they understood it into the vocabulary of the modern age while circumventing anti Catholic attitudes in the process However their method resulted in a series of unintended consequences whereby their arguments were not infrequently co-opted and used against both them and the institutional church they served Alexander Pavuk considers the complex role of both liberal religious figures and scientific elites in evolution and birth control discourse and how each contributed in unexpected ways to the reconstruction of those topics in public culture The reconstruction saw the topics themselves shift from matters considered largely within moral frameworks into bodies of knowledge **South-eastern France, from the Loire to the Riviera**
