Knowledge Technology And Cluster Based Growth In Africa Wbi Development Studies:

Knowledge, Technology, and Cluster-based Growth in Africa Douglas Zhihua Zeng, 2008 Africa is on the move demonstrating in recent years a significant potential for economic growth Although the region still faces many challenges it is also generating pockets of economic vitality in the form of enterprise clusters that are contributing to national regional and local productivity Through case examples from Ghana Kenya Mauritius Nigeria South Africa Tanzania and Uganda this book provides an understanding of how these dynamic enterprise clusters were formed and have evolved and how knowledge human capital and technology have contributed to their success Global Trends in Computing and Communication Systems P. Venkata Krishna, M. Rajasekhara Babu, Ezendu Ariwa, 2012-08-08 This two volume set CCIS 0269 CCIS 0270 constitutes the refereed post conference proceedings of the International Conference on Global Trends in Computing and Communication ObCom 2011 held in Vellore India in December 2011 The 173 full papers presented together with a keynote paper and invited papers were carefully reviewed and selected from 842 submissions The conference addresses all current issues associated with computing communication and information The proceedings consists of invited papers dealing with the review of performance models of computer and communication systems and contributed papers that feature topics such as networking cloud computing fuzzy logic mobile communication image processing navigation systems biometrics and Web services covering literally all the vital areas of the computing domains *Informal Sector Innovations* Mammo Muchie, Saradindu Bhaduri, Angathevar Baskaran, Fayaz Ahmad Sheikh, 2017-10-02 It is well documented that the space of informal economic activity is rising across the globe This rise has been particularly significant in the least developed and developing countries especially after the onset of neo liberal policies and withdrawal of welfare state There has also been a shift in academic thinking on informal sector with attempts being made to understand the contribution of informal sector in generating employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities Indeed with the retreat of welfare state and the introduction of contract labour in the formal sector many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy particularly in less developed countries This volume addresses a specific concern the issue of knowledge generation and innovative activities which lies at the core of sustained competitive advantage of these activities The chapters in this book were originally published in the African Journal of Science Technology Innovation and Development *Building Engines for Growth and Competitiveness in China* Douglas Zhihua Zeng, 2010-08-25 In the past 30 years China has achieved an unprecedented development miracle in human history How did China achieve this What are the key drivers for such a rapid growth And most importantly what can be learned from China's success While many factors could be identified to explain China's success it is no doubt that the numerous Special Economic Zones SEZs and industrial clusters that emerged after the country's reforms are two important engines that have been driving China's rapid development The key experiences of China

s SEZs and industrial clusters could be best summarized as gradualism with experimental approach strong commitment and an active facilitating state with strong pragmatism This book reviews the development experiences of China s SEZs and industrial clusters through extensive research field visits and case studies in an attempt to benefit the policy makers development practitioners scholars from developing countries and the global development community in general It contains five detailed case studies three SEZs in the broadest sense Shenzhen Tianjin and Kunshan and two industrial clusters Wenzhou footwear cluster in Zhejiang and Xiqiao textile cluster in Guangdong This volume represents the most comprehensive volume to date on China s experiences with both its SEZ and cluster experiences *e-Pedia: Captain*

Development for the 21st Century David O'Connor,Monica Kjollerstrom,2008-06-01 With very few exceptions industrial development has been central to the process of structural transformation which characterises economic development Industrial Development for the 21st century examines the new challenges and opportunities arising from globalization technological change and new international trade rules The first part focuses on key sectors with potential for developing countries focussing on two key themes First traditional points of entry for late industrializers like textiles and clothing have become even more intensely competitive than ever before requiring more innovative adaptive strategies for success Second

countries now recognize that manufacturing does not exhaust the opportunities for producing high value added goods and services for international markets Knowledge intensity is increasing across all spheres of economic activity including agriculture and services which can offer promising development paths for some developing countries The final section addresses social and environmental aspects of industrial development Labour intensive but not necessarily other patterns of industrial development can be highly effective in poverty reduction though further industrial progress may be less labour intensive A range of policies can promote industrial energy and materials efficiency often with positive impacts on firms financial performance as well as the environment Promoting materials recycling and reuse is an effective if indirect means of conserving resources Finally the growth of multinational interest in corporate social responsibility is traced with consideration given to both the barriers and opportunities this can pose for developing country enterprises linked to global supply chains

Entrepreneurship in the Informal Economy Mai Thi Thanh Thai, Ekaterina Turkina, 2013-03-05

Although entrepreneurship in the informal economy occurs outside state regulatory systems informal commercial activities account for an estimated 30% of economic activity around the world Informal entrepreneurship goes unmonitored despite the fact that it significantly contributes to poverty reduction and economic development As a result the informal sector is open to unethical practices including corruption worker exploitation and natural environment abuse to name just a few In the media debates have formed around whether informal entrepreneurship should be assisted or legitimized Hence a deep understanding of the phenomenon is vitally important This book is the first on the market to offer models and approaches to informal entrepreneurship as well as to its prospects for economic development Offering an in depth examination of informal entrepreneurship in many different countries it reveals the motivations for engaging in entrepreneurship in the informal economy characteristics of informal entrepreneurship and informal entrepreneurs response to ethical issues This volume illustrates the relationship between formal and informal economies and the conditions for the benefits of informal entrepreneurship to outweigh its disadvantages And finally it gives recommendations about when and how the informal economy can be formalized which sectors should be formalized and which ones can remain informal This book offers much needed guidance for stakeholders involved in economic development programs and scholars and entrepreneurs interested in the field of informal entrepreneurship as it is developing around the globe

Creating Systems of Innovation in Africa Mammo Muchie, Angathevar Baskaran, 2013-01-29 The most popularised concept in the economics of innovation literature has been the national system of innovation NSI It was in the late 1980s that the concept that Frederik List coined as the National Political Economy of Production took off again with different thinkers writing about the peculiarities and distinctions of the Japanese American British German East Asian Tigers and other varieties of system construction Freeman defines National System of Innovation as the network of institutions in the public and private sectors whose activities and interactions initiate import modify and diff use new technologies Richard Nelson defines it as a set of institutions whose interactions determine the innovative performance of national firms Lundvall defines the system of innovation as the elements and relationships which interact in the production diffusion and use of new and economically useful knowledge and are either located within or rooted inside the borders of a nation state The normative assumption is that those nations that succeeded in building economic strength relied on the science engineering technology and innovation capability that made them to achieve an innovation advantage to put them ahead in the world acquiring national or regional economic leadership as the case may be depending on what level of analyses is selected to look at particular failure success or progress they made In this volume we have a glimpse of how in different African economies from Ghana Uganda Kenya South Africa and Nigeria specific cases have been taken to explore how systems of innovation is evolving
